

## Mastermind Code Breaker - Board Game for Healthy Brain

Published on 04/12/14

Train the brain and have fun at the same time - Mastermind Code Breaker game by Peakssel LLC is now available on the App Store for the iPhone, iPad and iPod touch. The aim of the game is to get the right combination, the code hidden in the board. Players should break the code of 4 pins - their color and their place in the board. There are over one million possible combinations. The game can be played for months and years.

Nis, Serbia - Mastermind Code Breaker - Board Game, a game developed and published by Peakssel LLC, is one of those logic games that can be seen as an easy pastime game or an addictive brain training game. It's now available on the App Store for free download.

Mastermind Code Breaker is a classic board game. The aim of the game is to get the right combination, the code hidden in the decoding board. The code breaker should break the code of 4 pins - their color and their place in the board. There are 6 differently colored pins, 8 attempts and only 1 right code. All in all, there are over one million possible combinations. The software is made to help the code breaker by giving some feedback after every attempt. With this number of different codes available, the game can be played for months and years.

"Mastermind is one of the best games of our childhood. Since these new generations don't have any idea what they are missing by not playing classic board games, we wanted to recreate this cool game for them so that they can use it on their smartphones. Hopefully, they'll like it as much as we do," said Djordje, a game developer at the company.

Mastermind is an old-school game, but still very popular one. There are few similar games on the store, all of which have its advantages and disadvantages. Try this one and see what makes it different from all the others.
