

## Microspot releases MacDraft version 6.1

Published on 04/29/14

UK based Microspot Ltd. today announces the release of the latest version of their 2D Drafting, Design and Illustration software MacDraft Professional and MacDraft Personal Edition. With the new version of MacDraft you will be drawing faster, with more confidence and more creativity than ever before. Now OSX Mavericks compatible, version 6.1 introduces new gradient strokes and fills, improved DWG/DXF import and export to support the latest DWG file types and so much more.

Maidstone, United Kingdom - Microspot Ltd. today is proud to announce the release of the latest version of their 2D Drafting, Design and Illustration software MacDraft Professional and MacDraft Personal Edition. With the new version of MacDraft you will be drawing faster, with more confidence and more creativity than ever before.

### What's New in 6.1?

**Faster Drawing:** Our most requested feature from power users has been single key shortcuts for the main tools in the application. This allows you to flip from tool to tool without constantly moving the mouse away from the drawing area to select the next tool. Additionally the new star tool makes it quick to draw complicated multi-pointed stars, which can be ungrouped and edited.

**Confidence:** MacDraft is now OSX Mavericks compatible giving you the confidence to upgrade (if you have not already done so) knowing that MacDraft 6.1 will deliver the same or better drawing speed and accuracy. We have also updated and improved DWG/DXF import and export to support the latest DWG file types making MacDraft more compatible with other CAD resources.

**Creativity and feedback:** Your creativity will blossom with our new gradient strokes and fills allowing you to create much more professional looking illustrations and designs. In addition to this you can also add new colours, patterns and gradients without overriding the originals, which means your imagination is the only limit to your new designs. More realistic feedback when dragging and drawing gives MacDraft a new feel and puts you more in control and also now you can simply drag your designs into the library for future use without holding the command key.

These combined with other features that MacDraft 6.1 offers will improve the quality of your drawings and designs and you will boost your productivity.

### Pricing and Availability:

Microspot MacDraft Professional and MacDraft Personal Edition 6.1 are available only from the Microspot web store. Microspot MacDraft Professional has a retail price of \$349.00 USD (GBP 239.00 or Euro 344.00) and the Personal Edition is \$129.00 USD (GBP 79.00 or Euro 115.00). Registered users of MacDraft Professional may upgrade to version 6.1 from version 6.0 for \$89.00 USD (GBP 59.00 or Euro 69.00) or from any other version 5 for \$149.00 USD (GBP 99.00 or Euro 119.00) or any older versions for \$199.00 USD (GBP 129.00 or Euro 159.00). Registered users of MacDraft Personal Edition may upgrade to version 6.1 from version 6.0 for \$55.00 USD (GBP 36.00 or Euro 45.00) or from any older version for \$69.00 USD (GBP 46.00 or Euro 55.00).
