

Power Grid for the iPhone introduces a 7 day Sale

Published on 07/29/09

Los Angeles Entertainment Group, the development group behind the hit puzzle game Power Grid for the iPhone are happy to introduce a 7-day sale for the game allowing users to buy it at 80% off. Power Grid is a game with a basic concept of restoring power to an apartment building through the manipulation of blocks into various positions. Power Grid has recently generated a lot of media attention for its addictive gameplay and mass appeal to a large demographic of iPhone users.

Los Angeles, California - Los Angeles Entertainment Group, the development group behind the hit puzzle game Power Grid for the iPhone are happy to introduce a 7-day sale for the game allowing users to buy it at 80% off, only 99 cents. Power Grid has recently generated a lot of media attention for its addictive gameplay and mass appeal to a large demographic of iPhone users.

Power Grid is a game with a basic concept of restoring power to an apartment building through the manipulation of blocks into various positions and making a path for the power to flow across the board into the building. Obstacles (such as locked blocks) are introduced later in each game mode to hinder your progress.

In the first gameplay mode, Classic, a grid for each level is provided. The user then manipulates the blocks by tapping each one and rotating them into the best position. A user receives time and score bonuses for making connections to multiple levels of the apartment complex at one time.

In Arcade mode, blocks fall from the top of the grid and must be rotated and placed into position before hitting the ground. When the block has hit the bottom of the grid the user can no longer manipulate the position or rotation of the block. Los Angeles Entertainment Group plans to create monthly updates of the Game. These free updates will provide users with new features, options, and even a new gameplay mode - Gambit. These new features will be largely determined by the community.

Features:

- * 80 Levels of challenging gameplay spanning 2 game modes
- * Updates with new features and game modes bi-monthly
- * Play on the go with iPhone compatibility

Los Angeles Entertainment Group actively listens and requests information from their users as-to how they believe the game could improve. These suggestions are used to generate the new features given in each update. If a users feature suggestion is used, they will be awarded with free downloads of any/all Los Angeles Entertainment Group software into the future.

Minimum System Specifications:

- * iPhone 3G, 3GS, iPod Touch (2nd Generation) 3.0 or later

Pricing and Availability:

Power Grid sells for \$2.99 (USD). However, during the one weeks sale Power Grid will be sold at \$0.99. Media outlets interested in reviewing Power Grid for their publication may contact us for promotional codes. Please note we can not offer these codes to everyone, as there is a limit.
