

AWS announces new "top-secret" application and the biggest sale

Published on 07/26/07

Agile Web Solutions announced today the private release of its new "top secret" product my1Password and the biggest one-day only sale of 1Passwd. my1Password is a ground-breaking security application that takes password and confidential information management to the next level.

FOR IMMEDIATE RELEASE

Toronto (Ontario, Canada) - JULY 26, 2007 - Agile Web Solutions announced today the private release of its new "top secret" product my1Password and the biggest one-day only sale of 1Passwd.

my1Password:

Currently available "by invitation only" Agile Web Solutions' new product is scheduled for public release in the beginning of 2008. my1Password is a ground-breaking security application that takes password and confidential information management to the next level.

Biggest 1-day sale of 1Passwd:

To celebrate personal achievements and anniversaries, Agile Web Solutions will be holding a huge 1-day only sale of 1Passwd -- the most popular password manager and form filler for Mac OS X. The sale will be conducted on July 26, 2007 in partnership with MacZOT: <http://maczot.com>

What is 1Passwd?

- * The most widely used password manager for Mac (according to MacUpdate, VersionTracker and iUseThis websites).
- * The only password manager with integrated anti-phishing technology.
- * Automatic form filler with support for multiple identities.

1Passwd Features:

- * Manage hundreds of passwords with one master key.
- * Automatic form filler outclasses the other AutoFill products.
- * Prevent phishing criminals from stealing your information.
- * Stop keyloggers from recording your passwords and credit cards.
- * OS X Keychain integration provides maximum security.
- * Integrated with Safari, OmniWeb, DEVONagent, Firefox, Camino, and Flock.
- * Easily import from Safari, Firefox, Web Confidential, and RoboForm.
- * Take your passwords with you on your Palm / Treo. (with 1Passwd Reader for Palm application)
- * .Mac integration allows passwords to be synced across machines.
- * Generate and enter strong passwords with a single click.

Save your time, never worry about remembering passwords again, and protect your identity from phishing and keyloggers with this sophisticated password manager for Mac OS X. These unique features made 1Passwd the most popular password manager for Mac with tens of thousands satisfied customers worldwide in less than a year.

1Passwd requires Mac OS X 10.4 (Tiger) and is available for download from <http://1passwd.com>

Free version of 1Passwd is available and limited to 1 Identity and 12 Web Forms. Full unlimited 1Passwd version is sold for \$29.95 USD. Special media licenses and my1Password invites are available for members of the press upon request.
