

SWF Protector 2.0 released - Protect your Artwork from Theft

Published on 08/03/09

DcomSoft today released SWF Protector 2.0, their powerful new SWF file protection utility for Mac OS X Tiger and Leopard. This easy-to-use tool helps you protect your SWF files in very reliable way. Various protection algorithms provide you with the most profound encryption of the scripts in your file. Versatile settings allow you to customize your protection in different ways. From now on, no one will be able to steal ActionScripts from your SWF file for their own purposes.

Nice, France: DcomSoft today released absolutely new powerful SWF Protector, that works on Mac OS X 10.4 and Mac OS X 10.5. This very simple to use, yet very profound tool helps you protect your SWF files in very reliable way. From now on nobody will be able to steal ActionScripts from your SWF file and will never be able to use them for their own purposes.

Did it happen to you to have created an amazing SWF file using all your skills and knowledge and then find out that somebody has reverse engineered your brainchild and uses it for their own purposes? We don't think it is suitable, so DComSoft has developed the application that will help you preserve your Flash animations from unauthorized usage.

Welcome totally new DComSoft SWF Protector for Mac! With this tool it is so easy to protect your SWF file ActionScripts in such a way that nobody will be able to restore them, because SWF Protector for Mac makes source code of SWF file completely inaccessible for SWF decompilers.

Versatile settings allow you to customize your protection in different ways.

DComSoft SWF Protector for Mac offers its users two protection modes: simple and advanced. Simple mode allows processing many SWF files at a time and SWF Protector chooses the protection mechanism based on peculiarities of the files. In Advanced mode one can process one file at a time, and the settings can be selected very specifically for each object.

Various protection algorithms of SWF Protector for Mac provide you with the most profound encryption of the scripts in your file.

SWF Protector Main Features:

- * Four reliable protection algorithms
- * Full support of AS 2.0 and AS 3.0
- * Two protection modes: Simple and Advanced
