Newton, Mass - Popular Mac-only game publisher, Red Marble Games, today announced the release of I-Play's popular Dr. Lynch: Grave Secrets game for the Macintosh. Unique, with an engaging storyline developed by award-winning game designer Jane Jensen and beautiful art, Dr. Lynch is a compellingly fun game that raises the standards in the crowded hidden-object genre.

Players take on the role of Dr. Ignatius Lynch, investigator of paranormal claims, after a report of ghost sightings at an archeological dig near Hereford, England. There clearly is something afoot, but is it supernatural? Or is there something even more interesting going on here?

In addition to finding hidden objects, players gather clues to the mystery from a collection of colorful characters. The game also includes a collection of bonus puzzles that depart from the hidden-object routine and that derive from the game's story.

Reviewing the Windows version, Gamezebo said: "Production values are wonderful, items make sense in the context of the scene, and the mystery story contains enough twists and turns to keep you interested throughout the game's 14 investigations and 28 locations."

Founded in 2002 by Mark Batten, Mac game publisher Red Marble Games came about with the idea of bringing great independent games, originally developed for the Windows platform, over to the Mac. By focusing on porting and publishing rather than on original development, Red Marble Games is able to make a broader array of high quality titles available for Mac people to enjoy. Red Marble Games is proud to be a Mac-only games company, and focuses on bringing Mac users games that are easy to learn and fun to play over and over again. Red Marble Games' titles are intended to appeal to the whole family.
