

## Preschool Aquarium Sets A New Bar for Children's Learning Apps

Published on 07/01/14

Parents love learning apps and children adore them. Preschool Aquarium is the new release by Fairytale Studios and features educational gameplay that has never been seen before on a mobile device. The app incorporates unique learning games designed by award winning preschool teachers and early learning psychologists. This distinction sets Preschool Aquarium apart from the competition, it is a game designed for children by professionals. Available now on iOS, Google Play and the Amazon App Store.

Anchorage, Alaska - Parents love learning apps and children adore them. Preschool Aquarium is the new release by Fairytale Studios and features educational gameplay that has never been seen before on a mobile device. The app incorporates unique learning games designed by award winning preschool teachers and early learning psychologists. This distinction sets Preschool Aquarium apart from the competition, it is a game designed for children by professionals.

Preschool Aquarium features three immersive learning games that could pass for full-fledged apps in themselves. The three games are numbers, letters and sea creatures. All of the games are designed via advanced algorithms to be unlimited in nature and endless for a child to focus on a specific discipline. There are hours and hours of excitement, perfect for restless toddlers that want to be entertained while a parent can feel relaxed as they are professionally designed for learning.

The specialty of the game comes with the questions that are designed by preschool teachers and learning professionals. They are endless and everything on the screen is touchable and fully interactive all the time. This is a game changer for children as it allows scenes to expand and gives the child an opportunity to explore even while answering a question about fish schools or numbers. An added bonus to staying in a large scene is the ability for the child to play the app longer without assistance from his/her parents to navigate.

### Device Requirements:

- \* iPhone, iPad, and iPod touch
