

Upload 2014 World Cup videos to YouTube/Vimeo for sharing

Published on 07/18/14

With Pavtube Video Converter, users can enjoy recorded FIFA World Cup videos on smartphones, tablets, HDTVs, HD media players. The FIFA World Cup is an important worldwide event held every four years. With a DVR, camera or camcorders, fans are able to record World Cup videos for future playback and enjoyment such as playing on mobile devices, watching on HDTV's, and more. The Pavtube Video Converter is the perfect tool for recording.

Mt Vernon, New York - The FIFA World Cup is an important worldwide event held every four years. Every time the quadrennial moment comes, people around the world get excited and never stop talking about their favorite football players and teams. With a DVR, camera or camcorders, football fans are able to record World Cup videos for future playback and enjoyment such as playing on mobile devices, watching on HDTV's, burning to optical discs, storing to NAS servers and uploading to video websites for sharing. All these future purposes can be realized with Pavtube Studios.

Smartphones, tablets, HDTVs, HD media players, NAS servers, editing tools or most video websites fail to support video formats (e.g. TiVo, MXF, MOV, M2TS, and other HD video formats) generated by FIFA World Cup video recording. Pavtube Video Converter Ultimate can handle those videos made by DVR, cameras or camcorders properly.

With Pavtube Video Converter, users can enjoy recorded FIFA World Cup videos on smartphones, tablets, HDTVs, HD media players; cut out commercials and create your very own World Cup video; store them on hard disk drive or online server for safekeeping; burn them to blank DVD discs; edit them in FCP, iMovie, Adobe Premiere and more. Also upload them to those famous video websites.
