TopXNotes was awarded 4 out of 5 mice in a full review by Macworld 5 and stars by Macworld UK who stated: "There are tons of note-taking apps for the Mac. The QuickNotes feature is a good reason to pick this over the rest."

TopXNotes was also previously awarded 4 out of 5 mice by Macworld magazine in their "Summer of Mac Gems" series of reviews, by Macworld Australia, and recently by Macworld UK.

TopXNotes was 9 of 10 by Macsimum News (now part of MacTech), and highly rated by the Macintosh Guild and Mac360. Macworld praised TopXNote's "clean, single window interface that puts controls for highlighting and marking up your text right at your fingertips," as well as for its "killer" QuickNotes feature.

To quote Ron Mc Elfresh's review at Mac360, "I'm a notes freak. I have notes on everything. From to-do items to code snippets to tasks and projects to article ideas. Here's an understated, unloved, deceptively powerful notes app worthy of some Mac love...it's loaded with user features that set it apart from other note taking apps. TopXNotes is deceptively powerful and flexible, probably because the interface is immediately familiar."
