

High Resolution Interactive 3D Chess with Warrior Chess 1.18 for iOS

Published on 07/29/14

After Dark Studios today announces Warrior Chess 1.18 for iOS, an update to their high resolution 3D chess game. Themed in the year 1066, Warrior Chess is an interactive chess game based on the historic Battle of Hastings. With 99 different AI difficulty settings, players have a choice of challenging another player or the computer in timed or untimed games. Warrior Chess also offers a helpful How-to-Play tutorial, the ability to save and load games, and a move hint generation feature.

London, United Kingdom - After Dark Studios today is proud to announce the release and immediate availability of Warrior Chess 1.18, an update to their historic and high resolution 3D chess game for iPhone, iPad, and iPod touch devices. Themed in the year 1066, Warrior Chess is an interactive chess game based on the historic Battle of Hastings.

With 99 different AI difficulty settings, Warrior Chess offers players the option of one or two-person mode in time or untimed gameplay. Timed games can be set from 5 minutes to 59 minutes with a helpful clock that marks time. Untimed games also provide a timekeeper so players can determine how long it takes them to make a move.

Feature Highlights:

- * Visually stunning User Interface
- * Based on the Battle of Hastings
- * Interactive 3D, zoom, and pan around chessboard
- * Choice of player vs. player or player vs. CPU
- * 99 AI difficulty settings from easy to hard
- * Timed games from 5 minutes to 59 minutes
- * 2nd camera mode that focuses on piece being played
- * Offers move hints
- * Ability to undo and redo moves
- * Includes "How to Play" tutorial
- * Displays all moves for current game
- * Ability to restart completed games from any previous point and play again
- * Ability to save and load games to be analyzed or finished later
- * Support for "Castling," "En Passant," and "Pawn Promotion"
- * Retina rendering support

Warrior Chess allows a unique level of interaction to enhance the gameplay experience. Players have the ability to zoom and pan around the board to view the chess pieces. There is also a 2nd camera mode that focuses on the piece the player is currently playing.

"There is little competition in the number of apps on the market that can provide the 3D experience created by After Dark Studios," says Leon at Blah Blapp. "Its original 3D approach makes it unique and as such worth considering." He adds that it is "well suited for the casual chess player who cares about the 'fun' part of the game." (28 Nov 2013)

For the novice, Warrior Chess offers a helpful How-to-Play tutorial that explains each chess piece, its available moves, and ranks. Players can also receive hints on available chess piece moves if they get stuck. Warrior Chess shows all moves the current game and there is an undo/redo feature that is even available after Checkmate.

Warrior Chess allows players the ability to save games and load them to be replayed, analyzed, or finished at a later time. At the restart of a previously completed game, players can choose from any previous point and play again. Warrior Chess also provides support for "Castling," "En Passant," and "Pawn Promotion."

"Play chess in this glorious high resolution 3D world of Warrior Chess!" says John Pullen of After Dark Studios. "You can battle the CPU or challenge another player and place your device on a table like a real chessboard.

Device Requirements:

- * iPad, iPhone, and iPod touch devices
- * Requires iOS 4.3 or later.
- * 37.0 MB

Pricing and Availability:

Warrior Chess 1.18 is only \$1.99 (USD) and available worldwide exclusively through the App Store in the Games category. Review copies are available upon request. Warrior Chess is also available for Android, PC, and Kindle.
