

ZiggySoft releases iMusic Valet: iPod-like Audio Player on your Desktop

Published on 08/14/09

ZiggySoft has announced iMusic Valet 1.0.1. iMusic Valet is an easy, elegant, ready-to-use iPod-like MP3 player on your desktop; link your favorite photos or images with songs, set your playlists and more. iMusic Valet allows you to either play a single music file at a time, or else it lets you continuously or randomly play all the music files within a selected directory, or within your iTunes music library.

Rome, Italy - ZiggySoft has announced iMusic Valet 1.0.1. iMusic Valet is an easy, elegant, ready-to-use iPod-like MP3 player on your desktop; link your favorite photos or images with songs, set your playlists and more. iMusic Valet allows you to either play a single music file at a time, or else it lets you continuously or randomly play all the music files within a selected directory, or within your iTunes music library.

iMusic Valet complete features will allow you to:

- * Link your favorites pictures to your songs, to be displayed in your iMusic Valet window as you listen music
- * Enjoy the modern Apple's iPod-like theme
- * Play collections of songs in sequence or randomly
- * Collect songs from your iTunes music library, from your Hard Disk or from connected external devices
- * Create playlists containing mixed songs from multiple libraries
- * Have your iMusic Valet little window acting as a normal application or floating above every other application to be always accessible and showing your photos as a digital photoframe
- * Quickly consult the digital clock on the upper side of the iMusic Valet window, and, clicking on the clock, display a nice calendar always updated

Version 1.0.1:

- * Added Unicode compatibility for file paths
- * Fixed a bug creating new playlists

Pricing and Availability:

iMusic Valet 1.0 is available now for 9 Euro (12.00 USD). It supports Mac OS X 10.4, 10.5.
