

CADintosh 8.0 - High Performance 2D CAD Program Significantly Updated

Published on 08/08/14

Lemke Software GmbH today announces CADintosh 8.0, a significant update to its high performance 2D CAD program for Mac OS X. Designed especially for Technical Draftsmen and Designers, CADintosh includes a wide variety of tools to develop technical, mechanical, and architectural drawings. Completely rewritten in Cocoa, version 8.0 includes many enhanced and updated features including support of 64-bit, sandboxing (App Store version only) and complete Unicode support.

Peine, Germany - Longtime Macintosh developer and publisher, Lemke Software GmbH today is pleased to announce the release and immediate availability of CADintosh 8.0, a significant update to its high performance 2D CAD program for Mac OS X. Designed especially for Technical Draftsmen and Designers, CADintosh includes a wide variety of tools to develop professional technical, mechanical, and architectural drawings.

CADintosh includes many workflow improvement and usability advantages. Pre-settings are saved for each drawing and the number of elements that can be used is limited only by the available memory of the OS. Version 8.0 includes a new intuitive one window interface.

Feature Highlights:

- * Updated and simplified User Interface
- * The number of elements is only limited by the available memory
- * Saves pre-settings for each drawing
- * 8 pens with freely definable line widths and line colors
- * 6 different line types
- * Line widths from 0.0 to 99.99 mm with each element designated a different color and width
- * Functions available for lines, circles, dimensioning, hatching, X lines, etc.
- * Allows 32,000 groups
- * Supports 1,024 layers
- * Complex layer management
- * Import and export of DXF, HPGL, IGES and PDF
- * Unicode support
- * Support for symbol libraries for the import and export of symbols
- * Alternative units (i.e. inches)
- * Runs natively in OS X
- * Support of retina displays

"CADintosh, designed for 2D technical drawings, is a great drafting tool for Mac users," says Narinder Dogra of Mac Guild (6 Aug 2005). "CADintosh is loaded with tools! With so many tools and options at an engineer's disposal, creating 2D drawings is sheer joy!"

CADintosh provides the user with a wide variety of design tools at their disposal. Each drawing created in CADintosh is composed of layers that can be conveniently grouped and organized. CADintosh allows up to 1,024 layers and 32,000 groups. Users can quickly and easily create lines, circles, text, dimensions, X-lines, hatching, and set scale within their drawing. CADintosh includes 8 different pens of varying widths, colors, and styles. There are also 6 different lines types available including full line, dotted line, chain line, dotted line with two dots, zigzag line, and short dotted line. In individual mode, lines widths vary from 0.0 to 99.99 mm and each element can be designated a different color and width. Each function can be conveniently changed by accessing drop-down menus at the top of the drawing.

A native MAC OS X application, CADintosh supports the import and export of several file

types including DXF, HPGL, IGES and PDF. Although CADintosh includes internal symbols, registered users can also import and export symbol libraries that can be utilized in their design. CADintosh also allows users to save symbols they've created in an archive. CADintosh projects can be created in metric or imperial units.

Completely rewritten in Cocoa, version 8.0 includes many enhanced and updated features. CADintosh now supports fullscreen and most other Cocoa services. There is also support for 64-bit and Unicode. Additionally, many internal bugs were fixed and dialogs simplified. In the MAS version of CADintosh, sandboxing support is also supplied.

"Twenty years ago, I began developing CADintosh with friends I met years on a programming course at an adult education center," Thorsten Lemke, president of Lemke Software explains. "Today, we are specialists in various areas and continue to inspire and augment one another. Although two members of our team are no longer involved, the rest of us continue to meet. Every Friday. To make CADintosh better and more powerful for our customers." He adds, "CADintosh delivers the most professional and well thought-out features for all your design requirements - all for an unbeatable price and representing an excellent value."

Language Support:

* English, Danish, French, German, Italian, Japanese, Spanish, Portuguese

Device Requirements:

* OS X 10.7 or later

* 22.7 MB

Pricing and Availability:

CADintosh 8.0 is only \$33.99 (USD) and available worldwide through the Mac App Store in the Graphics & Design category. It can also be directly purchased online from the Lemkesoft website for \$32.00 (USD).
