

## PromptSmart Launches as First Teleprompter App with Voice Recognition

Published on 08/14/14

Belleau Technologies LLC today introduces PromptSmart 1.0, a revolutionary app that transforms your iPhone or iPad into a fully functioning teleprompter. PromptSmart takes the stress out of public speaking. With VoiceTrack voice recognition technology, PromptSmart will follow your every word during your speech, automatically scrolling as you speak. For less structured presentations, stay on-point with the built-in digital notecards to make sure you address important topics seamlessly.

New York, New York - PromptSmart, the new teleprompter app available for iPad and iPhone launches today as the first voice-guided public speaking aid with VoiceTrack™ proprietary voice recognition technology. VoiceTrack™ is a breakthrough in mobile voice recognition technology. It seamlessly follows spoken words and pauses during a speech, adjusting the speed of scrolling text in real time based on the speaker's actual words and pace. Because the speaker is in total control over the scrolling, PromptSmart delivers a more intuitive experience than even traditional teleprompters and needs no speed calibration. Additionally, the voice recognition processing is completed on the device itself eliminating the need for an internet data connection.

PromptSmart also recognizes that many speakers prefer to use notes to guide their talks rather than full texts. For this style, PromptSmart includes a digital notecard feature which enables users to stay on-point with functionality to create, rearrange, and set optimum viewing parameters for notecards.

Whatever the style of the speaker, PromptSmart delivers professional tools with cutting edge technology and an easy-to-use interface. PromptSmart is the ultimate presentation companion to de-stress any public speaking occasion in business, at school, on the campaign trail or anywhere else.

Select features of PromptSmart include:

- \* VoiceTrack™ proprietary voice recognition: PromptSmart follows vocal cues, adjusting scroll speed according to the user's pace and position in the text (no data/ internet connection required)
- \* Easy to use: PromptSmart is ready to go as soon as it's downloaded, no need to calibrate
- \* Place-holding: Go off script? PromptSmart will standby until the speaker returns to the text
- \* Customization: Adjust fonts, text sizes, text color, etc. Set timers, scroll speeds and more
- \* Speeches on the go: Download .docx or .txt files from the cloud or email and PromptSmart automatically transforms them into speeches and/ or digital notecards
- \* Voice recording: Record and practice speeches. Play them back to note improvements

Founder and CEO Eric Sadkin on PromptSmart: "From my time coaching MBA students in public speaking, I saw an opportunity to significantly improve the speaking experience using today's mobile technology. PromptSmart aims to be the most advanced, accessible speech aid for any speaker."

Device Requirements:

- \* iPhone, iPad, and iPod touch
- \* Requires iOS 6.0 or later
- \* 50.6 MB

PromptSmart was born out of a passion for public speaking. As a Communications Fellow at Wharton Business School, PromptSmart CEO and Founder Eric Sadkin coached and mentored students in the art of public speaking. Realizing that many orators would be better supported by an intuitive, speaker-controlled teleprompter and a way to digitally create and display notes, Sadkin also recognized that today's mobile devices could address these needs. With these in mind, PromptSmart was created. All Material and Software (C) Copyright 2014 Belleau Technologies LLC. All Rights Reserved.
