

## Macgo Mac Blu-ray Player New Version 2.10.8 Perfectly Supports iOS 8

Published on 09/18/14

Macgo team has launched its new version of Mac Blu-ray Player as a response to Apple's newly released iOS 8. Mac Blu-ray Player can work perfectly on iOS 8 owing to Macgo's AirX technology. Now Mac Blu-ray Player users can share Blu-ray movies between their Mac & iOS devices faster than ever. iPhone 6 and iPhone 6 Plus with their new features can definitely bring Mac Blu-ray Player users to a great Blu-ray world. The latest version mainly solved the unsmooth playback aimed at the newest discs.

Hong Kong, Hong Kong - Apple has just held its September 9 media event 2014 and unveiled two new iPhone models: the 4.7-inches iPhone 6 and the 5.5-inches iPhone 6 Plus, which stand for the biggest advancements in iPhone history and definitely lived up to iPhone fans' expectations. They both feature an A8 chip, Touch ID, faster LTE wireless, a new 8MP iSight camera with Focus Pixels, and iOS 8. As a response to Apple's great advancement, Macgo team has launched its new version of Mac Blu-ray Player 2.10.8 after unremitting efforts. The latest version is able to work perfectly on iOS 8. Now the mobile devices we support includes the recently released iPhone 6 Plus and iPhone 6.

iOS 8 is the world's most advanced mobile operating system. With incredible new capabilities and features designed to make the most of a larger display, iOS 8 doesn't just work seamlessly with iPhone 6. It makes every experience feel bigger and better.

The new iPhone with its iOS 8 have better and higher-resolution Retina HD displays though the bigger than bigger screen. iPhone 6 is equipped with the 1334-by-750-pixel resolution at 326 ppi and iPhone 6 Plus with the 1920-by-1080-pixel resolution at 401 ppi. Mac Blu-ray Player users can have a unprecedented visual feast. What's more, the new iPhone are hugely powerful and enormously efficient with its innovations. Built on 64-bit desktop-class architecture, the new A8 chip delivers more power, even while driving a larger display. The M8 motion coprocessor efficiently gathers data from advanced sensors and a new barometer. And with increased battery life, the new iPhone lets users do more, for longer than ever. If users watch a 2 hour movie on the new iPhone, they would not be too worried about how much power it left. In addition, iPhone 6 and iPhone 6 Plus have faster LTE download speeds - up to 150 Mbps - New iPhone users can experience faster download and upload speeds for browsing the web, streaming music, watching online movies, and more. Now Mac Blu-ray Player users can share Blu-ray movies between their Mac and iOS devices faster than ever. iPhone 6 and iPhone 6 Plus with their new features can definitely bring Mac Blu-ray Player users to a spectacular Blu-ray world.

The latest version mainly solved the unsmooth playback problem aiming at hundreds of newest discs, including Predator 3D, Sherlock 2, Toy Story 3, Partenope, Mark Lui Thank You, and more. Users can download it and watch Blu-ray movies on iOS devices owing to Macgo's AirX technology.
