

Cynical Peak Software announces Cyndicate 1.0

Published on 08/02/07

Cynical Peak Software, LLC. is excited to announce the immediate release of Cyndicate 1.0, the next generation syndicated news reader for Mac OS X. Cyndicate is an easy-to-use, next-generation, RSS/Atom aggregator and content management application. Cyndicate will help you manage, view, read, and rate the syndicated content or feeds you'll find on personal blogs, news sites, forums, and around the Web.

Cyndicate provides full access to RSS and Atom syndication feeds in a familiar Mail-like interface. Users are able to manually sort and automatically filter articles into folders and with smart folders. Cyndicate will further aid the user by automatically rating new articles based on the users pervious likes and dislikes. Simply rate an existing articles and new articles will rated based on their content.

Additional Features;

- Persistence allows the user to decide the lifetime of the article.
- Labels and flag articles for additional option when organizing.
- Custom article display through an advance template system using HTML and CSS.
- Easy posting to social networking sites like Digg, del.icio.us, and StumbleUpon with ShareThis.

Cyndicate 1.0 requires Mac OS X 10.4.3 or later. The program can be registered for \$29.95 USD and comes with a fully featured 21-day demonstration period.
