

## Conference Dialer - Join a Meeting or Conference Call by Mobile?

Published on 09/29/14

Independent developer, Rony Ronen, announces Conference Dialer was released for iOS. Conference Dialer is a simple to use dialling tool for users, especially tailored to those who join in conference calls from their mobile device. Users can select a meeting and tap it to start the auto dial into the conference call. Conference Dialer enables users to modify the conference sequence number and save it for later use, plus store up to ten different call sequence numbers to be used as a speed dial.

Seattle, Washington - This week a new, easy to use and free app for dial into conference calls was released in the iTunes store. The name of the app is "Conference Dialer" and its purpose is to allow users to join conference calls without dialling. The Conference Dialer app is a simple to use dialling tool for users, especially tailored to the users who join in conference calls from their mobile device. Beginning with a list of their meetings, Conference Dialer users can select a meeting and tap it to start the auto dial into the conference call. Unlike other "dialer" apps, Conference Dialer enables users to modify the conference sequence number and save it for later use, as well as storing up to ten different conference call sequence numbers to be used as a speed dial.

Said Lead Developer Rony Ronen, "Typically, after dialling the conference number, you need to type the the conference access code and maybe other numbers such option or passcode. Those codes are provided in the meeting invite so you have to switch back and forth and type it in. If you are lucky you succeed in typing the entire code without having the conference timed out. No more!; Conference Dialer does it for you with one single tap."

### Features:

- \* One Tap Auto Dial Conference Calls using Conference Number, Option, Access Code and Pass Code
- \* Modify the Conference Sequence Numbers and save it for later use
- \* Save up to Ten Conference Predefined Sequence Numbers
- \* Display meeting list or only conference meeting invites
