

Space 2048 for Mac OS Released

Published on 10/03/14

New York based RoGame Software announces the release of Space 2048 for Mac OS. Space 2048

recreates the 2048 game in outer space with amazing visuals, animations and the universe as background. It has great sound effects, includes a soundtrack and has you move entire planets to get to your score in style, surrounded by asteroids, suns and galaxies. Space 2048 is the full game - no add ons needed and it makes for great entertainment for the entire family.

Rochester, New York - Single player games are a breed of their own. Unlike in chess or backgammon there is no opponent and at times not even a winner. We play these games because they provide a moment of respite - a chance to wrap one's thoughts around something non-vital yet challenging. These games are less about winning and more about spending some time "away."

Space 2048 emphasizes the mini-vacation aspect of the single-player game and moves us right into outer space. The backdrops are some of the most fantastic images taken by the Hubble Space Telescope with captions in the lower left screen to inform us if we are looking at the Antennae Galaxies, the Mystic Mountain or maybe the famous Ring Nebula.

Contributing greatly to the already quite fantastic atmosphere is the aural landscape of the game. It consists of deep rumbling sound effects that comment on the merging of planets, the achievement of a new level in moves or points and an entire soundtrack. The latter is barely audible at the beginning and slowly evolves into a part of the game's soundscape.

Game pieces are rotating planets expensively rendered in 3D each with their distinct character, some earth-like, some volcanic and some with moon. They are moved via the on-screen arrow buttons, WASD or arrow keys on the keyboard.

Quick Features:

- * Fully animated with superb visuals
- * Great soundtrack and effects
- * History of played games
- * Undo and Resume functionality
- * Supports arrow keys and WASD input
- * Complete game - no add ons needed
- * Enabled for Family Sharing

Space 2048 makes for ideal casual entertainment. The galactic backgrounds become more dramatic the further along you get in your game and you keep adding new planets. The soundtrack specifically written for Space 2048 enhances the overall atmosphere as soft background component. And most importantly there still is the challenge - to get to the magic number. Space 2048 is enabled for Family Sharing and really is great entertainment for the entire family.

Language Support:

Space 2048 is localized into Chinese, Danish, Dutch, English, Finnish, French, German, Greek, Italian, Japanese, Korean, Portuguese, Russian, Spanish, Swedish, Thai, Turkish and Vietnamese.

System Requirements:

- * Mac OS 10.6.6 or later
- * 73.1 MB
