Continuing its longstanding presence in the database community of over 15 years, dbdom.com offers several ways for developers and businesses to deploy solutions using the new features in FileMaker 9 product line.

FOR IMMEDIATE RELEASE

Manhattan, New York City, NY - July 16, 2007 - dbdom.com, an international series of data centers specializing in dedicated server hosting solutions, is proud to announce the immediate availability of FileMaker 9 Hosting and several Dedicated FileMaker Server 9 Advanced offerings. Continuing its longstanding presence in the database community of over 15 years, dbdom.com offers several ways for developers and businesses to deploy solutions using the new features in FileMaker 9 product line.

Publish and Run per database pricing: our standard per-database pricing solution allows developers to upload individual FileMaker 9 files to dbdom.com for publishing with FileMaker Server 9 Advanced. Access to client files is then available by FileMaker networking and also Instant Web Publishing (IWP). dbdom.com Publish and Run service is best for projects with a single or few databases that are accessed by small to mid-size workgroups.

FileMaker Server 9 Advanced Developer Edition, dedicated server: for developers and businesses with the need for up to 5 simultaneous client connections and web sessions, dbdom.com offers a Developer Edition of FileMaker Server 9 Advanced. With Developer Edition, small workgroups can take advantage of every aspect of the FileMaker 9 Server Advanced technology at a minimal price-point.

Developer Edition includes cross-platform control of the FileMaker Admin Console, database upload, scheduling, open/close commands as well as the PHP and XSLT Site Assistant and Instant Web Publishing engines. As the solution is dedicated, access to all of the server-side features of the technology are available as well as the admin console for deploying/monitoring up to 50 databases within your workgroup of up to 5 simultaneous FileMaker clients and 5 simultaneous web sessions. The dbdom.com FileMaker Server 9 Advanced Developer Edition service is available in configurations starting at \$80/monthly.

FileMaker Server 9 Advanced Enterprise Edition, dedicated server: for developers and businesses with the need for a large number of simultaneous FileMaker connections and web sessions, dbdom.com offers various dedicated server configurations for FileMaker Server 9 Advanced. With Enterprise Edition, large workgroups can take advantage of every aspect of the FileMaker 9 Server Advanced technology at an affordable price-point.

Enterprise Edition includes cross-platform control of the FileMaker Admin Console, database upload, scheduling, open/close commands as well as the PHP and XSLT Site Assistant and Instant Web Publishing engines. As the solution is dedicated, access to all of the server-side features of the technology are available including Instant Web Publishing, Custom Web Publishing and ODBC/JDBC sessions. Full control of the Security, Logging and Server Plug-Ins features of the server is provided as well as access to the PHP, XSLT, XML, ODBC/JDBC and Instant Web Publishing modules.

Cross-platform access is provided to the admin console for deploying/monitoring up to 125

prMac: Publish Once, Broadcast the World :: <http://prmac.com>

databases within your workgroup of up to 250 simultaneous FileMaker clients and 100 simultaneous web sessions. In addition to single server deployment, dbdom.com offers 2 server and 3 server deployment configurations to further accelerate processing between the database engine, web publishing engine and web server components of the solution.

Storage is provided on dbdom.com Enterprise Storage Area Networks (SAN) and is configured at RAID 50 for the highest data integrity available. dbdom.com FileMaker Server 9 Advanced Enterprise Edition is available in configurations starting at \$100/monthly with setup fees depending on configuration.
