

Ready for OS X Yosemite: DEVONagent 3.8.2 and DEVONthink 2.8.1

Published on 10/16/14

DEVONtechnologies, LLC today updates all editions of DEVONagent, its smart research assistant for OS X. Search the web like never before. DEVONagent Pro queries all major and minor search engines, weeds out all the junk, and presents the really good stuff nicely ranked the way you want. The update to version 3.8.2 gets all editions of DEVONagent ready for OS X Yosemite. Interface adjustments and other fixes make them compatible to Apple's newest Mac operating system.

Coeur d'Alene, Idaho - DEVONtechnologies, LLC updates all editions of its smart research assistant DEVONagent. The update to version 3.8.2 gets all editions of DEVONagent ready for OS X Yosemite. Interface adjustments and other fixes make them compatible to Apple's newest Mac operating system.

All editions of DEVONagent now also search Baidu, the #1 search engine in China. DEVONagent Pro lets users share web content via the Mac's native share mechanism on OS X Mountain Lion or later. Web addresses are named and displayed more user-friendly for a better research experience. For better highlighting and more accurate summaries DEVONagent Pro now uses a secondary search term if entered.

Scanners in version 3.8.2 are more accurate. Some overhauled scanner plugins return better results and are more reliable. Scanners in DEVONagent are plugins that filter results by formal criteria. For example they return only thumbnail galleries or pages with embedded videos. The new version also better filters links to social media, e.g. retweets.

All editions of DEVONthink as well as DEVONnote have received maintenance updates, too. Version 2.8.1 fixes a few more incompatibilities to the latest public beta of OS X Yosemite. It also works better with user-installed Spotlight plugins and imports incompatible files as generic items.

DEVONthink Pro Office 2.8.1 automatically reinstalls its Apple Mail plugin if necessary also on German and French systems. Finally, DEVONtechnologies has also increased the trial limit for imported email messages. Users can now import up to 1,000 messages per day when test-driving the app.

All updates come also with further improvements, are more reliable, and fix some bugs.

"Google, Bing, and DuckDuckGo are great search engines and easy to use. If one is serious about research, however, and wants to make sure to catch everything about a subject, then there's DEVONagent Pro. This new version returns even more accurate results, filters superfluous links, and creates precise summaries. Just what a good assistant does: help you get the job done." comments Eric Bohnisch-Volkman, President of DEVONtechnologies.

Pricing and Availability:

All editions of DEVONagent, DEVONthink, and DEVONnote require an Intel-based Mac and OS X

10.7.5 or later (in the App Store: OS X 10.8.3 respectively 10.9 (DEVONthink) or later).

They can be downloaded from www.devontechnologies.com and be test-driven for free before they need to be properly licensed. DEVONagent, DEVONthink Personal, and DEVONnote are also

available in the App Store; DEVONthink and DEVONagent can also be purchased as bundles in DEVONtechnologies' online shop.
