

Churr Software Releases Stock Investment Guide 3

Published on 08/24/09

Churr Software today is proud to announce the Stock Investment Guide 3, a stock analysis tool for new and experienced investors using Mac OS X. The Stock Investment Guide provides investors easy-to-use tools to analyze a company's earnings history to help forecast what earnings could be in five years. SIG can then tell the investor if the current PE ratio is in-line with its historical price range. The software is a powerful tool to help investors avoid paying too much for a stock.

Huntsville, Alabama - Churr Software today is proud to announce the Stock Investment Guide 3 (SIG), a stock analysis tool for new and experienced investors using Mac OS X. The Stock Investment Guide software is a powerful tool to help investors avoid paying too much for a stock. Users can view historical price graphs, research company news and competitors, and print professionally formatted analysis reports.

Version 3 adds a stock library feature that allows users to organize stock analyses in to portfolio groupings, much like playlists are used organize digital music. This update also integrates portfolio-level price updates, data updates, and analysis. Version 3 also integrates a side-by-side comparison of completed analyses, which is a tool to aid users in their quest to select the best stock candidate from among up to five good quality stocks.

Feature Highlights in Version 3.0:

- * A stock library to store completed analyses with the ability to sort analyses into portfolios for tracking and comparison
- * Automatically download stock data from BetterInvesting, Stockcentral, or free internet data sources
- * Built-in web browser with custom links that direct users to in-depth research for the company being analyzed
- * Graphs of earnings, sales, pretax profit, and more allow users to estimate the future earnings potential of a company
- * Determine Buy, Hold, Sell zones for each stock analyzed
- * Full support of the SSG data file format for sharing data with users of similar software
- * Crisp printed analysis reports and data graphs
- * Time-proven analysis methodology used by stock clubs worldwide

Supported Languages:

- * US English

System Requirements:

- * Mac OS X v10.3 or later
- * Mac OS X v10.5 (Leopard) compatible
- * Universal Binary for Power PC and Intel
- * Internet connection for stock data import

Recommended:
