

LinkOptimizer for Adobe InDesign Now Supports Mac OS X 10.10 Yosemite

Published on 10/30/14

Toronto based Zevrix Solutions today announces LinkOptimizer 4.9.28, a compatibility update to its popular workflow automation solution for Adobe InDesign. Awarded 4 out of 5 stars by Computer Arts magazine, LinkOptimizer allows to reduce InDesign link size and speed up processing by eliminating excess image data, performs essential image adjustments, converts image formats and more. The new version makes LinkOptimizer compatible with the recently released Mac OS X 10.10 Yosemite.

Toronto (ON) Canada - Zevrix Solutions today announces the release of LinkOptimizer 4.9.28, a compatibility update to its popular workflow automation solution for Adobe InDesign. Awarded 4 out of 5 stars by Computer Arts magazine, LinkOptimizer automates complex image manipulation tasks allowing to significantly reduce the size of InDesign links, save processing time and reduce production costs.

The new version makes LinkOptimizer compatible with the recently released Mac OS X 10.10 Yosemite and is offered as a free update to licensed users. A number of user interface elements were updated to display properly across multiple OS X versions.

"LinkOptimizer makes me extremely happy", says Nynke Tiekstra, the owner of design studio ColtsfootMedia in Friesland, Netherlands. "It converted 10,000 images in a 1800 pages project saving us at least 40 hours work, and it proved to be 100% accurate."

LinkOptimizer works automatically with Adobe Photoshop to eliminate the excess image data of InDesign links, perform essential image adjustments and convert image formats. For example, with just a click of a button users can:

- * Scale and crop images to match their dimensions in InDesign
- * Change their resolution to 300 dpi
- * Convert RGB images to CMYK
- * Apply color profile
- * Resave JPEG images as TIFF
- * Run a Photoshop Action on each image

At the end of processing, LinkOptimizer reimports images to InDesign at 100% in their precise position. In addition, the software can apply sharpening filters, merge layers and delete hidden ones, and process copies of InDesign documents and images instead of original files. As a result, users can save gigabytes of disk space and countless hours of optimizing images manually, accelerate document output, reduce job turnaround and cut costs through faster processing.

Pricing and Availability:

LinkOptimizer can be purchased from Zevrix website for \$259.95 USD (Light version: \$179.95) as well as from authorized resellers. Trial is also available for download. The update is free for LinkOptimizer 4.x users and \$130 to upgrade from previous versions. LinkOptimizer is available for Mac OS X 10.6-10.10 and works with Adobe InDesign and Photoshop CS3-CC 2014.
