

## Money by Jumsoft Updated for OS X Yosemite

Published on 11/10/14

Jumsoft today releases Money 4.6, a new update of its popular finance and budgeting app for OS X. Money by Jumsoft offers a powerful, comprehensive & intuitive system designed to help you keep control of your financial life. Oversee your account balances, track your income and spending, keep budgets, and have your data synced among your Mac, iPhone, and iPad via Dropbox. Version 4.6 features a number of interface and functionality improvements designed for full compatibility with OS X Yosemite.

Vilnius, Lithuania - Jumsoft, developer of high-quality applications for Mac OS X and iOS, today is proud to announce the release of Money 4.6, a new update of its popular finance and budgeting app for OS X. Version 4.6 of Money features a number of interface and functionality improvements designed for full compatibility with the new OS X Yosemite.

Money was first launched in 2003 and has gained wide popularity among small businesses and home users of Mac since. Fans of Money appreciate the synthesis of its high usability and effectiveness for finance management. Money allows users to track transactions to and from their wallets and bank accounts; make budget plans and monitor outcomes; and manage their bills. Besides, they can synchronize their data with the iPhone and iPad versions of the app over Dropbox.

"Money was fully functional on OS X Yosemite even before the latest update," said Algirdas Unguvaitis, the general manager of Jumsoft. "However, we've ironed out a few minor interface inconsistencies, making sure the Money experience on Yosemite is flawless."

The updated Money 4.6 presents several interface enhancements, including OS X Yosemite's signature vibrant look. It also includes various fixes of the CSV export functionality, improved data downloads from Bank of America, French localization improvements, and other minor fixes and refinements.

### System Requirements:

- \* OS X 10.7 or later
