

Mapdiva Launches Ortelius Map Illustration Software

Published on 08/26/09

Mapdiva, LLC today announces the first release of Ortelius map illustration software for Mac OS X. Ortelius is a vector-based drawing and cartographic design program made especially for map design and presentation. Through its drag-and-drop interface, Ortelius offers a creative solution for floor plans, landscape plans, scaled drawings, and a wide variety of high quality custom maps, as well as serves to address a lack of mapmaking software for the Mac OS X platform.

Indianapolis, Indiana - Mapdiva, LLC today announces the first release of Ortelius map illustration software (\$79 introductory price) for Mac OS X. Ortelius is a vector-based drawing program made especially for (though by no means limited to) map design and presentation. Through its drag-and-drop interface, Ortelius offers a creative solution for floor plans, landscape plans, scaled drawings, and a wide variety of high quality custom maps.

Designed for incredible ease-of-use, it allows you to draw directly with features such as roads, rivers, coastlines, buildings, symbols, and contours. Fitting for reports, presentations, books, research papers, invitations, magazines, websites, brochures, public displays, and new media applications with professional-level results.

Every drawing feature supports map attribute information, such as those imported from geographic information system (GIS) map data, that can be quickly referenced by Ortelius' intelligent text labeling system. Create your own styles and symbols or use any of the many hundreds built-in. Trace and draw over scanned maps and images, import GIS data from shapefiles, and make maps from included templates.

Features of Ortelius Standard Edition:

- * Dozens of fully editable map templates
- * Smooth vector graphics
- * Automatic junctions and style transitions
- * Direct intelligent labeling
- * Hundreds of styles and symbols
- * WYSIWYG drawing and editing
- * Introducing Linear Select(TM)
- * Layers and layer groups
- * Scalable maps and plans
- * 20+ special drawing tools
