

FaceMixer 2.0 for iPhone - Now with Facebook support and new interface

Published on 08/27/09

New York based Larva Labs today announced FaceMixer 2.0, an update to their Facebook app for iPhone and iPod touch. Combine your friend's faces just like the original, but with full Facebook integration and a brand new interface. Download photos from your friend's Facebook profile or albums, then mix them with your existing faces for posting back to Facebook. Photos are automatically tagged with the friends included in the photo.

New York, NY - FaceMixer for iPhone, the Apple staff pick, has been upgraded to version 2.0. Take the eyes, nose and mouth from three different friends and create a whole new person. The natural flip book interface allows for quick flipping between options. Store unlimited faces in your library to allow thousands of combinations.

Version 2.0 contains full Facebook integration and a brand new interface. Download photos from your friend's Facebook profile or albums, then mix them with your existing faces for posting back to Facebook. Photos are automatically tagged with the friends included in the photo.

What's new in 2.0:

- * Add faces directly from Facebook with our in-app photo browser
- * Post mixed faces to your Facebook account with automatic tags for the people in the photo
- * Totally redesigned interface and user flow
- * Includes several stock images to start your face library
- * Improved performance and photo quality

FaceMixer features:

- * Add faces from camera, gallery or Facebook
- * Store unlimited faces in your library of friends
- * Drag, pinch and rotate photos to get them perfectly positioned
- * Flip through face pieces individually with natural swipe gestures, or let the program make a random face for you.
- * Save to gallery, Facebook

Minimum Requirements:

iPhone or iPod touch 2.2.1 or later

Pricing and Availability:

Facemixer 2.0 is free upgrade for existing users, or 99 cents to purchase for new users. It is available now.
