

Freeridecoding releases SmartBackup 2.1

Published on 08/09/07

Freeridecoding announces a major update for its straightforward backup tool SmartBackup v2.1. SmartBackup supports sorted archiving of deleted or changed items, file exclusion, handling of multiple backup sets, one-click restore and automation using iCal, Automator or shellscripts. Version 2.1 includes many important improvements.

IMMEDIATE RELEASE

Freeridecoding announces a major update for its straightforward backup tool SmartBackup v2.1. SmartBackup is the ideal application to backup personal data to hard drives, network sharepoints, webDAV, usb sticks, iPods etc.

SmartBackup is very easy to set up. It supports the use of Spotlights "saved searches" as backup items or to define exclusion which makes creating dynamic backups very simple. SmartBackup supports sorted archiving of deleted or changed items, file exclusion, handling of multiple backup sets, one-click restore and automation using iCal, Automator or shellscripts. Be smart - backup different.

New in 2.1:

- * launchable with superuser privileges
- * Improved cleanup and archiving
- * Improved handling of metadata
- * Improved backup to network shares
- * Updated interface
- * German localisation
- * New automator action
- * Several bugfixes

System Requirements:

- * Intel or PPC Mac
- * MacOSX 10.3
- * MacOSX 10.4 for Spotlight support
- * Ready for Leopard

Languages:

- * English
- * German

Licenses: Single 15 Euro (appr. 21USD), Family Pack 30 Euro (appr. 42USD), Site licenses available.
