

Speed Download turbo-charged for Snow Leopard

Published on 08/28/09

Yazsoft today announced Speed Download 5.2.3, an important update to their popular download manager for Mac OS X. Speed Download 5 redefines the Mac OS X download manager by combining four amazing products: a turbo-charged download manager, a fully featured secure FTP client, a file sharing utility with full encryption, and complete .Mac/iDisk/WEBDAV connectivity, into one small and easy to use application. Version 5.2.3 is updated and tweaked specifically for Snow Leopard.

Chicago, Illinois - Yazsoft today announced Speed Download 5.2.3. Developed exclusively for Mac OS X, Speed Download is an easy to use, powerful and reliable download manager. Speed Download sets a higher standard for download manager innovation, and is expressly designed to be a central, unified hub for almost all downloading and file transfer activities. This major new update continues to enhance and tweak the performance of Speed Download to ensure utmost reliability.
