

Reilly Technologies updates Moneydance 2007

Published on 08/10/07

Reilly Technologies announces the update of Moneydance 2007, their full-featured personal financial management application. With a familiar checkbook-register interface, Moneydance includes features such as online banking, online bill payment, investment management, budget tracking, scheduled transactions, check printing, detailed graphs, reports, and much more. Moneydance's easy-to-use interface sets it apart from other financial software. This update includes many enhancements.

IMMEDIATE RELEASE

Williamsburg, Virginia - Aug 10, 2007 - Reilly Technologies LLC announces the update of Moneydance 2007, their full-featured personal financial management application. Moneydance's easy-to-use interface sets it apart from other financial software. With a familiar checkbook-register interface, Moneydance includes features such as online banking, online bill payment, investment management, budget tracking, scheduled transactions, check printing, detailed graphs, reports, and much more.

Save time and money with online banking and bill payment. Moneydance makes it easy to set and trace budgets, as well as setting reminders for upcoming bills. Its reporting and graphing tools illuminate finances to show where money goes. Users may track their portfolio and investments. Moneydance offers encryption and password-protection to ensure privacy, keep finances organized, safe and up-to-date. This update includes many enhancements.

Feature Highlights in Version 2007:

- * Added print function in account and category list windows
- * Added Open Recent sub-menu with recently opened files
- * Added non-prorated budget interval option
- * Added batch change feature to quickly change certain fields for many transactions at once
- * Improved matching algorithm for downloaded transactions
- * Improved interface for editing split transactions
- * Many minor interface improvements and bug fixes

Supported Languages:

- * US English, Spanish, French, German, Korean, Portuguese, French, Italian, Greek, and Norwegian

Moneydance offers extensive multi-currency support, and can also track and calculate VAT and GST for easy tax reporting. Users may automatically download up-to-date exchange rates and choose a different base currency for each account.

System Requirements:

- * Requires Mac OS X v10.3 or later.
- * 5 MB Hard Drive space.
- * 128MB RAM or higher.
- * Moneydance 2007 supports Mac, Windows, Linux, Solaris, OS/2, and Unix.
- * Moneydance data is completely portable between platforms, allowing maximum flexibility.

Moneydance uses industry standard technologies such as OFX, QIF, SSL/TLS, Java, and XML to ensure compatibility with other software and services. In addition, Reilly Technologies' open API and Extension Developer Kit allow advanced users to extend the software.
