Portland, Oregon - Dejal Systems, LLC today introduces Pack version 1.0 for the iPhone and iPod touch, just in time for the holiday travel season. Pack is a very simple packing list app, so you can get packed quickly and easily. There's no need to maintain separate lists for each trip. There's no need to guess and enter unnecessary details like weight or cost for each item. It has a clean and elegant appearance, without blinding you with wacky colors and images.

Pack comes with a catalog containing hundreds of items as a starting point. Quickly add, edit or delete them to make your own personalized list.

When preparing for a trip, simply skim through the list, checking or unchecking items as needed for this journey. When ready, flip over to start packing, crossing off items as you put them in your suitcase. The Choose and Pack lists can be arranged by item name, category, or person name, and can be filtered to show only packed, packed at the end, or all. Pack is free to use, and includes an optional one-time in-app purchase to unlock all of the app's premium features:

- * Add an unlimited number of items
- * Add new categories
- * Rename categories
- * Delete unused categories
- * Add multiple people
- * Arrange items by person

Purchasing also helps support further Pack development. To learn more, See a demo video and more screenshots on the Pack website.
