

eWeather HD adds new weather widgets for iOS8, barometric sensor support

Published on 12/19/14

Elecont LLC today announces eWeather HD 3.3, the biggest update to its full-featured weather forecast app for iPhone and iPad. eWeather HD provides all the weather info you need in one place, easily customized to track conditions for the places you care about. Version 3.3 introduces a new 10-day weather forecast widget, Retina HD graphics for iPhone 6 and iPhone 6 Plus, support for barometric air pressure sensor, sharing capabilities to Instagram and much more.

Saint-Petersburg, Russian Federation - Elecont LLC is very excited to announce the release of eWeather HD, their biggest release of 2014. With new features you can utilize the power of newer iPhone and iPad devices. The new release, available from December 18, is packed with various new features and updates making the eWeather HD better than ever!

eWeather HD provides all the weather info you need in one place, easily customized to track conditions for the places you care about. Based on an original idea, eWeather HD lets you put a simple, smart and beautiful analog clock with hour-by-hour weather forecast right on Notification Center. We're sure you will enjoy using the app and that it will meet all your needs and expectations for weather information.

eWeather HD 3.3 introduces several brand new components and advantages:

- * Widget that displays current weather conditions and weather forecast up to 10 days
- * Animated weather clock widget that displays hourly weather forecast
- * Realtime air pressure data anywhere your iPhone 6 or 6 Plus or iPad air 2
- * iPhone 6 and 6 Plus screen resolutions
- * Improved graphics based on iOS 8 designs concepts
- * Sharing to Instagram
- * Better resolution for weather radar for the U.S. and Japan
- * Various minor bug fixes and performance improvements

eWeather HD combines ten day and hourly weather forecasts from multiple sources with a beautiful radar and satellite images and unique "weather clock" interface. In addition to various weather data the app provides water temperature at beaches around the world, hour-by-hour UV levels, data from NOAA buoys, earthquakes, severe weather alerts for U.S. and Europe and much more.

Winter is the time of year when many things change - including the weather. Thunderstorms and hurricanes cause most of the severe Winter weather. They can bring lightning, tornadoes and flooding. eWeather HD provides access to the most relevant weather forecasts, weather alerts, marine and seismic data. Prepare for storms, floods, and tornadoes as if you know in advance they are coming, because in the summer, they very likely will.

Winter is a great time to travel. In reality trying to take a vacation without planning ahead rarely works out that well. Discover your best beach vacation spots with eWeather HD ! eWeather HD is the most complete weather app that provides all of the necessary information about weather and water on worlds popular beaches and resorts. Explore unique interactive map to find the best place to spend a vacation. We're sure you will enjoy using the app and that it will meet all your needs and expectations for weather information.
