

Opportun delivers innovative Apple mobile SMB and enterprise solutions

Published on 09/02/09

Montreal based Opportun is fully Apple Certified, a member of the Apple Consultants Network and a member of the Apple Developer Connection. Opportun offers business class expertise from design to deployment of Apple, iPhone, CRM, ERP, BI, e-learning and collaborative solutions. All solutions are based on Apple technologies and can be integrated with your existing IT infrastructure.

Montreal, Quebec - Opportun is fully Apple Certified, a member of the Apple Consultants Network and a member of the Apple Developer Connection including an iPhone certified developer working with Apple Stores, Apple, Rogers resellers, Marketcircle and FileMaker to provide robust SMB and enterprise solutions.

Opportun offers business class expertise from design to deployment of Apple, iPhone, CRM, ERP, BI, e-learning and collaborative solutions. All solutions are based on Apple technologies and can be integrated with your existing IT infrastructure (Windows and Linux).

Opportun brings more than 15 years of experience with small, medium and large enterprises across North America. We provide accelerators that reduce projects complexities and increase quality of solutions for any type of business industries. Our network of partners allow us to have access to the right IT specialists that complement our core competencies. Having access to the right expertise is a critical success factor for any business and IT project.

By delivering solutions, Opportun covers hardware, software, development and installation aspects. We bring strong expertise on enterprise software solutions that are configured or tailored to specific business needs for iPhone, Macs and Xserve. By combining existing Apple software like Podcast Producer, iChat, Wiki, Mail and iCal server with proven packages like CRM, ERP and BI solutions, we are helping businesses to achieve their goals even if employees or users are on the road.

We provide all range of services to help defining the business case with the TCO, project scope, solution design and architecture document (hardware, storage, operating system, software, backup, mobile access), configuration and development, deployment and support. We help companies to switch to Apple technologies in order to reduce their IT costs and increase user productivity. Hundreds of businesses realized that Apple technologies are contributing directly to their success while enabling new ways of working and learning.

Our services offering includes:

- * Business case and TCO analysis
- * Preliminary and detailed architecture
- * Detailed design and specifications
- * Development and configuration
- * Hardware and software procurement with financing
- * Deployment, change management and support
- * Project management and strategic advisory services

Our solutions offering covers:

- * iPhone deployment
- * iPhone Configuration Utility
- * Mac OS X and Mac OS X Server
- * Mail Server and Mobile Access Server for iPhone
- * Podcast Producer for eLearning

prMac: Publish Once, Broadcast the World :: <http://prmac.com>

- * Wiki Server for collaborative work
- * Daylite and Daylite Touch CRM solutions including configuration and implementation
- * FileMaker Pro based solutions including CRM and ERP solutions (JobCentral Pro)
- * Existing software integration and interfaces (SOA)
- * Pentaho BI solutions for iPhone and Macs
- * iPhone native applications
- * iPhone compatible web sites
- * Xsan storage solutions

All enterprises can benefit from Apple technologies, from simple productivity utilities to well integrated mobile solutions based on iPhone. No matter what size your business is, you can start with simple implementation and leverage platform components included over the years by using preinstalled productivity software and services at no additional cost.
