

SweetP Productions releases Privatus 3.0 for Mac OS X

Published on 01/08/15

SweetP Productions today releases Privatus 3.0, a cookie management product for Mac OS X. Privatus revolutionizes Mac OS X cookie management, providing an effortless and affordable solution for online privacy concerns. Privatus removes cookies, and unnecessary cookies, flash cookies, silverlight, and databases from your Mac, automatically. Built for ease of use, there is nothing to configure, no favourites, no whitelists, no blacklists, no problems. Privatus just works.

Surfers Paradise, Australia - SweetP Productions today is proud to announce the release of Privatus 3.0, a cookie management product for Mac OS X. Privatus has been designed from the ground up with simplicity and internet privacy in mind. Built for ease of use, there is nothing to configure, no favourites, no whitelists, no blacklists ... no problems!

Privatus just works! Privatus has been designed for Mac OS X Yosemite, and removes all cookies, flash cookies, silverlight, and databases from your Mac, automatically. It is easily configured to run from your system MenuBar, or even headless, Privatus works silently, and methodically in the background, clearing all unwanted data when you close your browser session without any user interaction.

Features:

- * Automated Cookie, Flash Cookie, Silverlight and Database removal
- * Automated Browser Cache removal
- * One time setup, and forget
- * Accessible from the system menu bar
- * Highly intuitive

Privatus takes the headaches out of cookie management, and free's your time to be more productive. All the major Mac OS X browsers are supported: Safari, Firefox, Chrome, Chromium, and Opera.

Device Requirements:

- * Mac OS X 10.9 or later
- * 3.3 MB disk space

Pricing and Availability:

Privatus 3.0 is available exclusively through the Mac App Store and is available initially at no cost (Free!).
