

Adaptive SAT - Math released for iPad - A smart way to prepare for SAT

Published on 01/15/15

Appzest Inc. today announces Adaptive SAT - Math 1.1, their new SAT exam preparation app for iPad. Serving as a catalyst for students in preparing for the crucial SAT exam, Adaptive SAT was developed with a modern adaptive software methodology and designed to help students identify their weak areas and then practice and develop these areas. This version of the app caters only to Math and is divided into four skills, including geometry, algebra, arithmetic and statistics and probability.

Omaha, Nebraska - Appzest Inc., the Omaha based developers of EZ Math series of apps for Middle and High School students, today is proud to announce the release of Adaptive SAT - Math 1.1, their new SAT exam preparation app for iPad. This is not your run-of-the mill routine test preparation app. This app is smart and uses the principles of adaptive software concept to really help the students. This version of the app caters only to Math and is divided into four skills similar to SAT test, i.e. geometry, algebra, arithmetic and statistics and probability.

Students need to take a short skill test on each of these areas. Based on the test, a custom menu of topics is created that needs more attention from the students. These are the topics where the students have fared relatively lower than other areas and hence these topics are designated as Focus Topics in the app. Students can then practice on these individual focus topics within the app and then try the skill assessment test again. The more tests they attempt the more better and crisper are the focus topics. By actually pinpointing and working on the focus topics should help the student improve the individual skill. A detailed explanation is provided for each answer.

Features:

- * Math topics divided into four skills; Geometry, Algebra, Arithmetic and Statistics & Probability
- * Each skill is further divided into focus topics and the menu for Focus topics practice adapts to the performance on the skill test
- * Graphical and Tabular representation of Scores and progress report. A quick tracker on main screen for birds eye view of the overall progress
- * No Internet needed to access the test or practice on the topics
- * Create a list of favorite questions
- * Email any question to friends or other interests.
- * Huge database of questions that is oft refreshed and updated
- * Access previous skill test history at any time
- * No ads or any other annoying pop-ups
- * No in-app purchases
- * No social media integration
- * No Analytics integration, we value your privacy
- * No push notifications
- * No noise, no frills, a silent app

A detailed and graphical representation of score in the app is designed to give a better understanding of the overall progress. A birds-eye view of the progress report is also provided on the main screen as in the form of a progress tracker. Apart from the this, one can also share any question with anyone via email or bookmark the question as favorite and access later. The Skill test history can also be accessed any time.

Device Requirements:

- * Compatible with iPad
- * Requires iOS 6.1 or later

prMac: Publish Once, Broadcast the World :: <http://prmac.com>

* 20.0 MB
