Brno, Czech Republic - Czech based Mad Finger Games today is proud to introduce Samurai: Way of the Warrior 1.0, their new action game for iPhone and iPod Touch. Developed specifically to leverage the iPhone's unique abilities, Samurai features intense hack and slash combat with beautiful, stylized graphics and a compelling story line. Offering different combo attacks, players battle enemies from village to village in a feudal 16th century setting. The game also offers a special Dojo gameplay mode where players can sharpen their skills to master the art of the sword.

Set in the middle of the Sengoku period, play as Daisuke Shimada, a wandering samurai who travels around Japan. During the most dangerous times, Daisuke must ultimately defeat the mad and awful Daimyo Hattoro, who rules the province. And because Daisuke is samurai who obeys his moral principles and self-sacrifice, he takes it as his duty to continue until Daimyo will be killed.

Samurai: Way of the Warrior is action game played from the top-down perspective and offers two modes of gameplay. Offering hours of intense fights, the game features compelling environments; forests, indoor, outdoor castles, and prison scenes. In single player mode, gamers progress through different levels, gather experience by killing enemies, unlock new combo attacks and encounter several boss battles. In Dojo mode, players fight in the arena sparing enemies in the rounds - and have only one life - and must survive injury to keep their health up for the duration.
