

Stellar Information Systems Releases Stellar Wipe 1.0 for Macintosh

Published on 09/04/09

Stellar Information Systems Limited announces the launch of Stellar Wipe 1.0 for Macintosh. Stellar Wipe is a user-friendly data erasure tool for permanently erasing all data from Macintosh hard disks, making its recovery impossible. It uses effective methods to overwrite and thus remove all the traces of data stored on the hard disk. Meeting the most stringent data overwriting regulations, it is a highly reliable tool that prevents your business sensitive data falling into offensive hands.

Gurgaon, India - Stellar Information Systems Limited the leading providers of data recovery software and services and data protection solutions, announces the launch of Stellar Wipe (Macintosh) v1.0 for permanently erasing all data from Macintosh hard disks, making its recovery impossible.

It is a user-friendly data erasure tool that uses effective methods to overwrite and thus remove all the traces of data stored on the hard disk. Meeting the most stringent data overwriting regulations, it is a highly reliable tool that prevents your business sensitive data falling into offensive hands. The free demo version of the product is available at Stellar's website.

"Companies often store their sensitive information on hard drives that might fall into wrong hands and can cause security breaches. When discarding, selling or recycling Mac hard drives, companies require complete data removal to stand against any chance of criminal liability that might harm their reputation and market presence." said Sunil Chandna, Stellar Information Systems CEO.

"Simple file deletion, disk formatting or emptying the Trash Bin doesn't delete the data for always as lost data can be still recovered. Stellar Wipe (Macintosh) v1.0 is an effective data erasure tool that uses advanced wiping algorithms to overwrite existing data with random binary digits."

Key Features of Stellar Wipe (Macintosh) v1.0:

- * Wipes files and folders individually
- * Wipes system traces like access logs, install logs, and console logs
- * Wipes Web browsers' data including Temporary Internet Files, Cookies, Page History, and Form Values
- * Supports wiping data for Web browsers like Internet Explorer, Firefox, Camino, Opera OmniWeb, and Safari
- * Wipes unused hard disk space
- * Selective wiping algorithms
- * Schedules wipe process

Pricing and Availability:

Stellar Wipe (Macintosh) v1.0 is a cost-effective data wiping tool. The single user download edition of the tool is available at \$39 (USD) per license.
