

## **Adaptive Storage-Top Desk for Mac Eliminates Clutter and Tools**

Published on 02/23/15

Klevr Furniture today announces their new Storage-Top Desk for Mac, a functional design built specifically for iMacs and MacBooks. Each desk is made to order and conveniently stows away cables, power adaptors, and additional clutter. Table-top notches are strategically placed for MacBook and iMac connectors, and movable panels allow easy access to storage. The sleek design offers plenty of work space for the avid Mac user and provides storage underneath for printers and accessories.

Fort Worth, Texas - Klevr Furniture today is proud to announce the Storage-Top Desk for Mac, a sleek design tailored for iMac and MacBook users. Developed specifically to leverage the Mac's unique capabilities, Klevr Furniture offers a desk space with built-in functionality to hide cable wires, power adaptors and clutter. Strategically placed notches and movable panels make storage and set-up easy and convenient. The Storage-Top Desk is incredibly strong and built to last, yet it requires no tools and assembles by hand in only a couple of minutes.

The unique desktop has three movable panels, each containing portholes for various devices. The center panel contains a central notch for the iMac's rear plugs, while the two other panels offer notches that line up with the ports on the sides of MacBooks. Additional front and back notches are available for supplementary devices and wires, plus they double as finger-grooves for easy removal of panels. Panels conveniently glide on felt-lined rails and hang aside the desk when accessing the storage compartment. The two side panels are 12 inches wide, an ideal size for document scanners, 3D printers and more.

The Storage-Top Desk for Mac was created by a Mac software developer to elevate the nuances and complement the experience of modern iMacs and MacBooks. This desk is perfect for students who need a compact and efficient work environment. It is also a great choice for professional or personal Mac users that prefer a sleek, clutter-free workspace to enhance their daily experience. It offers a rock-solid comfortable design that increases productivity for long periods of time while providing a hidden home for peripherals and wires.

### Feature Highlights:

- \* Conceals wires, cables, and power adaptors
- \* Panels can be moved around for easy access to contents
- \* Portholes oriented for various devices
- \* Rounded edges for comfort and safety
- \* Lower shelf for extra storage
- \* Fits iMacs, MacBooks, iPads, and more
- \* Modern and sleek design complements the Mac
- \* Birch plywood with laminated surfaces for durability
- \* Flat pack for transport and convenient storage when not in use
- \* Easy tool-free assembly
- \* Made to order

The desktop has 46" x 30" of usable space and is made of strong pre-finished Finnish birch plywood that is laminated for a glass-smooth finish. Every edge is rounded for comfort and safety, and every panel is reversible for longer life should one get scratched or damaged. The durable construction offers owners the ability to assemble and disassemble the desk repeatedly without damage or wear. Klevr Furniture's patented design focuses on providing owners with an effortless assembly process. The tool-free design replaces damage prone press-fit joints with tabs and slots that easily and safely snap together by hand. No other tools necessary.

The Storage-Top Desk for Mac is made to order and can be assembled in minutes. The flat pack design allows owners to easily transport the desk or to conveniently store it away in less than five inches of space. Klevr Furniture also provides additional pieces like stackable shelves and coffee tables to complement the Storage-Top Desk and create a complete office environment, or to be used separately in different living spaces.

"My years of experience as an engineer and Mac software developer gave me an edge to provide Mac users like myself an affordable and practical solution for a clutter-free workspace," said Brock Brandenburg, president of Klevr Furniture. "The modern day Mac user wants that pristine, picture-perfect environment, but unfortunately almost every one of us is burdened with a tangle of untidy cables and accessories. The Storage-Top Desk provides a really sleek and functional way to organize and hide nearly all of your equipment, so you can focus on the Mac and not the chaos."

#### Product Details
