

iFunia Mac Video Converter Pro Get Snow Leopard Compatibility

Published on 09/05/09

iFunia has confirmed that iFunia Video Converter Pro is now fully compatible with Mac OS X 10.6 Snow Leopard. iFunia makes innovative, assistive technology and software for Mac OS X, as well as the iPhone, iPod. This Mac video converter helps consumers to convert their digital video content to appropriate format for use on personal computers or popular portable and mobile devices such as the Apple iPod, iPhone, Sony PSPs, Apple TV, and BlackBerrys.

Qingdao, China - iFunia, a professional developer of Mac multimedia applications, has confirmed that its flagship product - iFunia Video Converter Pro is now fully compatible with Mac OS X 10.6 Snow Leopard. iFunia makes innovative, assistive technology and software for Mac OS X, as well as the iPhone, iPod. This Mac video converter helps consumers to convert their digital video content to appropriate format for use on personal computers or popular portable and mobile devices such as the Apple iPod, iPhone, Sony PSPs, Apple TV, and BlackBerrys.

"Mac users can now enjoy the pleasure of video conversion of Apple's new Snow Leopard operating system." iFunia says. "The support resolves various bigger and smaller compatibility issues with Snow Leopard and all current users are strongly recommended to upgraded to the new versions before installing Mac OS X 10.6," the company adds.

With advanced video compression technology, iFunia Mac Video Converter Pro also supports for high definition video, Flash video and all the latest video formats and devices; the ability for users to edit video like trimming, cropping, merging, adding special effects and watermarks before conversion; and a convenient automatic shutdown feature. Furthermore, with multi-threading and batch conversion supported, it significantly increases the speed of the video conversion process.

Pricing and Availability

iFunia Video Converter Pro for Mac is available through the iFunia website. Exclusively for the Mac OS platform, it works Mac OS X 10.5 or later. It costs \$35 (USD) and is now available for download.
