

Track Kit - Record, Track and Share Your Best Travel Experience

Published on 03/05/15

Lifeware Solutions has released Track Kit Pro v2.0, their innovative GPS tracking application developed for iPhone and iPad devices. Featuring analog and digital speedometers, compass with military rangefinder, Track Kit Pro helps to keep and share memories about great events, journeys and adventures. Hikers, runners, tourists, drivers, hunters and fishermen can record and share their GPS tracks, pictures, notes, recommendations and guides - offline and in real-time.

Rockville, Maryland - Lifeware Solutions has released Track Kit Pro v1.4, their innovative GPS tracking application developed for iPhone and iPad devices. Hikers, runners, tourists, drivers, hunters and fishermen can record and share their GPS tracks, pictures, notes, recommendations and guides. The application helps to keep and share memories about great events, journeys and adventures. You can also track your friends locations in real-time!

Features:

- * Record your tracks, add waypoints and pictures to keep your traveling logs and prepare new routes to explore
- * Track your friends location in real-time
- * Offline maps: map caching for offline usage
- * Multiple alternative maps: Google, Bing, Bike, Hiking and others
- * Add images and Google street view panoramas to your tracks to illustrate your traveling experience
- * Create amazing presentations about places you traveled to, insert street view videos and even playback your tracks
- * Publish tracks on www.Track-Kit.net web site to organize your routes and compare multiple tracks
- * Share your tracks and pictures with friends via Gmail, Facebook or Twitter
- * GPX, KML, KMZ file import and export
- * Works with multiple tracks: display and compare all your tracks at once
- * Quick camera button to take pictures without switching to full-screen camera
- * GPS saving mode for long trips to save battery
- * Augmented reality and label tracking
- * Analog and digital speedometers, compass and military rangefinder with a set of sniper scopes
- * Works on all devices: iPhone, iPad, iPod touch

Track Kit allows you to create amazing tourist guides and save and edit your trails, add your photos and waypoints to a trip route, link images and videos to your map, embed maps and photos to your blog or website. www.track-kit.net offers a set of unique features for presenting your GPS tracks: image gallery combined with map, automatic GPS track playback, google street view video generation.

Device Requirements:

- * iPhone, iPad, iPod touch
- * Requires iOS 7.0 or later
- * 31.8 MB

Pricing and Availability:

Track Kit Pro v2.0 is \$0.99 USD for a limited time. Track Kit Pro is available worldwide exclusively through the App Store in the Navigation category.
