

New Mac Recovery Resource Launches With New Product Offer

Published on 09/08/09

Atlanta based Omer Faiyaz today is happy to announce his newly launched Mac Recovery website specifically for Macintosh users. The resource features contributors with hands-on experience in developing software for the Mac platform, and recovering lost data from laptops, desktops and servers, as well as outlines Mac recovery software, data recovery techniques with various do's and don't's for recovering data. To celebrate the launch, Mac Recovery is offering special deals on select Mac Products.

Atlanta, Georgia - Omer Faiyaz today is happy to announce his newly launched Mac Recovery website specifically for Macintosh users. The resource features contributors with hands-on experience in developing software for the Mac platform, and recovering lost data from Mac OS X-based laptops, desktops and servers.

Skilled, knowledgeable professionals uniquely outline the benefits of recovery software, share sophisticated data recovery techniques, and offer various do's and don't's for successfully recovering data. Practical and easy to understand, users now have a single resource to discover anything they need to know about hard drive recovery options available to them.

"Several times we have come across users asking questions on how to recover data from their Macs," said Omer Faiyaz, Founder of Mac Recovery. "At times these questions get very complicated due to the unique situation, and circumstances of the data loss. The Mac Recovery initiative serves to answer frequently asked questions, recommend various methods to backup and recover as well as provide great discounts to consumers for various software utilities."

To celebrate the launch, Mac Recovery is offering a limited time 10% discount on Disk Doctors Mac Data Recovery Software. The software is compatible with Mac OS X Snow Leopard and Tiger and is a stand-alone software solution, which supports both Power PC and Intel based Apple Mac computers. The product provides recovery from Hard Drives, Camera/Flash cards, Firewire drives, and USB drives that includes LaCie, iOmega, Seagate, Maxtor, G-drive and other popular storage options.

Features of Disk Doctors Mac Data Recovery Software Include:

- * Simple and intuitive user interface
- * Supports recovery of deleted files from Journalized Volume only
- * Powerful volume search option that helps locate lost or missing volumes from drives
- * Two options for disk volume processing to yield best data recovery results
- * Extremely fast, disk recovery and scanning algorithms
- * Presents recovered hierarchical data tree and find option similar to Mac OSX Finder
- * Selective find and save option
- * Save Scan Information feature helps to avoid rescanning a drive
- * Preview features helps in evaluating the files before recovery of files
- * Preserves the date, name and other attributes of recovered files after recovery
- * Universal application compatible with both Intel and PowerPC
- * Supports raw recovery of files using signature search in case of severe corruption to the volume

Minimum Requirements:

- * Mac OS X Version 10.4 Tiger or later (Snow Leopard compatible)
- * Universal Binary for PowerPC and Intel
- * 7.1 MB Hard Drive space
- * Minimum of 128 MB of RAM
