

Wi-Fire(TM) a new compact USB WiFi adapter for Macintosh released

Published on 08/16/07

Wi-Fire(TM), hField's new compact USB WiFi adapter for Macintosh, allows Mac users to connect to a WiFi networks from up to 1,000 feet, more than three times the range of Airport cards and other 802.11 adapters, at significantly higher speeds, and even in locations where no wireless signal could be detected previously.

BETHLEHEM, PA - August 16, 2007: hField Technologies has just launched the Wi-Fire(TM), a compact high-performance USB WiFi Adapter for Macintosh. With an integrated high gain directional antenna and extremely strong receive sensitivity, the Wi-Fire(TM) gives Macintosh users the freedom to connect to WiFi networks when they want, where they want. Users benefit from the increased mobility and greater range with faster speeds as compared to Airport(TM) or Airport Express(TM).

Wi-Fire(TM) provides interoperability with any 802.11 b/g access point and multiplies the effectiveness of wireless networks allowing users to connect to a WiFi network from up to 1,000 feet, more than three times the range of Airport cards and other 802.11 adapters, at significantly higher speeds, and even in locations where no wireless signal could be detected previously.

Wi-Fire(TM), only 3" by 4" with a sleek 3/8" thickness, is small, easy-to-use, and folds up with its mounting device and USB cable for portability. Images of Wi-Fire(TM) are available for download at <http://www.hfield.com/media/index.htm>.

Retail price for Wi-Fire(TM) is \$79.00 and is available now at <http://www.hfield.com/buynow> and participating retailers.

"Wi-Fire(TM) is the perfect device - light weight and easy to use - for the seriously mobile Mac user as well as Mac users who have problems connecting to their regular wireless network because of distance, obstacles or other interference," said Tom DiClemente, hField's CEO. "We're dedicated to Mac users connecting better, faster and more economically."

Wi-Fire is also available for Windows XP. Linux and Vista version are being developed.
