

Holiday-themed reMovem Halloween Edition iPhone game now available

Published on 09/08/09

Independent game developer Mundue LLC is pleased to announce the release of its latest game, reMovem Halloween Edition, a themed version of the wildly popular iPhone puzzle game reMovem. The Halloween Edition adds fanciful artwork and seasonal sound effects, while retaining the original game's successful clear and simple interface. The addition of online high scores and global leader boards is sure to make this a hit for players of all ages.

Acton, MA - Mundue LLC announces the immediate availability of the new game reMovem Halloween Edition. The Halloween Edition uses the same fast-paced addictive game play as the original reMovem free version, which has been downloaded millions of times since July 2008. In this incarnation of the classic bubble-bursting game, you rack up points by removing blocks of same-colored balls. Bonuses and awards along the way keep the game lively and challenging.

This version of the game replaces the simple colored balls with playful Halloween figures, such as ghosts, witches, and jack-o-lanterns. The optional game sounds are fun and scary reminders of the upcoming Halloween season.

"By including the AGON Online scoring system, we have added global leader boards, awards, maps, and optional Twitter and Facebook integration to the game" said Matt Martel, founder of Mundue LLC. "Now users can view their latest scores in the game or on the web, and compare high scores with friends around the world."

Feature Highlights:

- * Fast tap action
- * Ghoulish fun sounds
- * Choice of 4,5, or 6 scary ball figures
- * Undo last move
- * Large preview of selected block's score
- * Bonus for removing all balls from the board
- * Local and global high scores
- * Unlock secret awards
- * Publish scores to Facebook and Twitter

System Requirements:

- * Any iPhone or iPod touch
- * iPhone OS 2.2.1 or later
