Manly, Australia - Ohh Yeah!, an independent game studio, is pleased to announce the launch of Stunt Trails 1.2, its first major release now available for download on iOS. Stunt Trails is a racing game in which the player must guide a monster truck. By negotiating an imaginative variety of physics-based obstacles, crazy jumps and challenging puzzles the truck must clear one level to progress to the next.

The game is characterized by simple graphics, which encourage focus on the fun and challenge of the game-play itself, Stunt Trails is trickier to master than first appearances might suggest and players will find they test their skills of dexterity, speed and judgment increasingly throughout the game. By using the simple controls to drive and flip the monster truck, players can perform daring stunts as they make it safely to each level checkpoint.

Deon Du Plessis, the Lead Developer at Ohh Yeah! believes that players who download Stunt Trails to their mobile device expecting a simple racing game may be surprised to find that this unique game tests their skills to the limits and is more addictive than they may expect. He says: "Stunt Trails is not just another 'crash and burn' racing game but adds a puzzle element that makes it fun, engaging and very challenging." He added: "The unique graphics style strips everything back and puts the emphasis on the actual game-play. It's genuinely fun to play, and it's hard! It's definitely not your average jump and burn monster truck game."
