

BISCUE App/e-Learning for Japanese-Language Proficiency Test JLPT N1/N2

Published on 04/23/15

BISCUE App and BISCUE e-Learning, a business skills application and method provided by Shubiki Corporation of Japan has released a new series of Japanese language learning material designed for JLPT N1/N2 (Advanced Japanese) courses for its "BISCUE App" and "BISCUE e-Learning" programs in six languages on PCs, tablets, and smartphones. The courses are available in six languages, and are aimed toward preparing users for the Japanese-Language Proficiency Test (JLPT) Level N1/N2.

Tokyo, Japan - Shubiki Corporation, Japan's leading business content provider, has released a new series of four Japanese language courses in six languages aimed toward preparing users for the Japanese-Language Proficiency Test (JLPT) Level N1/N2 on smartphones, tablets and PCs.

Amidst the rapid process of globalization in Japanese companies, there have been a number of cases in which they hire foreign graduates. Developing the posture of these new recruits for business is still a work-in-progress as there are no specific methods for training and education in place.

This course is developed toward improving the Japanese ability of foreign staff working in Japan, providing them with a tool to enhance their daily lives and industry experience. As the central theme of this material is business, courses have been prepared in a multitude of languages including English, Chinese, Spanish, and French among others to allow for each staff to learn in their mother tongue.

These courses are available individually in the form of an in-app purchase through the "BISCUE App," as well as in bundles from the flat-rate libraries of e-learning "BISCUE LS" on smartphones, tablets, and PCs.

The Japanese-Language Proficiency Test (JLPT) has been offered by the Japan Foundation and Japan Educational Exchanges and Services (formerly Association of International Education, Japan) since 1984 as a reliable means of evaluating and certifying the Japanese proficiency of non-native speakers.
