

Stargazing Forecast App Sky Live Released for Apple Watch

Published on 04/28/15

Virginia based Vito Technology Inc. today announces Sky Live 1.1.0, an update to their stargazing forecast app for iOS devices. From cloud and visibility conditions, to the list of most interesting astronomy events, Sky Live will provide all the information needed to plan the perfect night of stargazing. Version 1.1.0 now works on Apple Watch to provide hourly location-based stargazing forecast with amazing space photographs and visual effects.

Alexandria, Virginia - Today Vito Technology Inc. announced that their stargazing forecast app Sky Live now works on Apple Watch to provide hourly location-based stargazing forecast with amazing space photographs and visual effects. From cloud and visibility conditions to the list of most interesting astronomy events, Sky Live will provide all the information needed to plan the perfect night of stargazing.

After launching your Apple Watch app you will be presented with the Stargazing Index - a percentage showing how good tonight is for stargazing. It is a combination of all relevant factors boiled down to one number:

- * Upcoming celestial events
- * Current phase of the Moon
- * Number of visible planets, stars, and constellations
- * Hourly weather report
- * Current cloudiness
- * Level of light pollution in the area

A scroll down in the app shows why the night is good in extensive detail. The user can see exactly how bright the moon is, which planets are visible above the horizon, how thick the cloud are, temperature, humidity and more. The Sky Live iPhone app and widget also have new revised design with clearer graphics and interface.

Highlights

- * Detailed info on stargazing conditions for any location in the world for seven days ahead
- * Option to save favorite locations
- * Moon phases
- * Rise, Set, and Max Altitude for the most important objects: the Sun, the Moon, Mars, Venus, Jupiter, Saturn and the International Space Station
- * Cloudiness
- * Weather forecast
- * Light pollution
- * The International Space Station position over the map
- * ISS crew data

Supported Languages:

Sky Live is localized to 10 languages: English, French, German, Italian, Spanish, Russian, Japanese, Korean, Chinese Simplified and Chinese Traditional languages.

Device Requirements:

- * iPhone, iPad, and iPod touch
- * Optimized for iPhone 5, iPhone 6/6 Plus
- * Requires iOS 7.0 or later
- * 38.0 MB
