

Econ Technologies Updates ChronoSync For Mac To 4.6.1

Published on 05/05/15

Econ Technologies today releases ChronoSync 4.6.1, the professional-quality, 3-in-1 app that Mac owners rely upon for standard backup, bootable backup, and folder synchronization. The app takes backup and synchronization performance to a whole new level. ChronoSync 4.6.1 is more than a maintenance release containing new features to go along with several fixes. Most notably, version 4.6.1 improves efficiency of backing up package files and maintaining bootable backups.

Casselberry, Florida - Econ Technologies today is proud to announce the release of ChronoSync 4.6.1, the professional-quality, 3-in-1 app that Mac owners rely upon for standard backup, bootable backup, and folder synchronization. ChronoSync 4.6.1 is more than a maintenance release containing new features to go along with several fixes. Most notably, ChronoSync 4.6.1 improves efficiency of backing up package files and maintaining bootable backups. ChronoSync, the complete Mac backup, bootable backup, and folder synchronizing app works with any device you can connect to a Mac such as external drives, thumb drives, network volumes, remote Macs, or even a PC. Download and try it out or purchase ChronoSync for \$49.99. As always, existing users update for free. We have continuously improved ChronoSync for over ten years and never charged for an update.

ChronoSync 4.6.1 includes new package file handling options, increased efficiency of maintaining bootable backups, enhanced progress reporting, as well as many more additional tweaks and fixes. The new package "Merge" option is the most efficient manner to handle large iPhoto, Pictures, Aperture or iMovie libraries. Learn more about 'The Package Conundrum' and how ChronoSync handles syncing, backing up, and archiving package files better than any other app. Check out the complete list of new features online.

This update follows the major release of ChronoSync 4.6 which includes over a dozen major new features. ChronoSync 4.6 takes backup and synchronization performance to a whole new level with SmartScan, an advanced algorithm for analyzing a volume for changes. File system analysis can often be the most time consuming part of a synchronization or backup. While SmartScan won't copy your files any faster, detecting which ones need to be copied can see dramatic speed improvements. Depending on your usage patterns, you may realize improvements ranging from 1x to 50x faster. SmartScan works across ChronoAgent connections too, so remote syncs and backups can see enormous speed gains!

Pricing and Availability:

ChronoSync, the complete Mac backup, bootable backup, and folder synchronizing app is designed to work on Mac OS X 10.8 and higher. Full working trial licenses are available or purchase ChronoSync for \$49.99 (USD). ChronoAgent is a Mac Utility that allows any local or remote Mac to accept direct, secure connections from ChronoSync. Full working trial licenses are available or purchase ChronoAgent for \$14.99. ChronoMonitor is an iPhone app that monitors Macs running ChronoSync or ChronoAgent. ChronoMonitor is available in the Apple App Store for \$3.99. Check out our Press Page for artwork and more information about ChronoSync, ChronoAgent, and ChronoMonitor.
