

Power APP released Version 1.6.0 of Battery Doc for iOS

Published on 05/12/15

Power App AG today announces Battery Doc 1.6.0, an important feature update to their popular battery management app for iPhone, iPad and iPod touch devices. Battery Doc uses proprietary algorithms to determine the remaining uptime for the device. The displayed numbers either show the remaining uptime for the actual state of the device or the remaining uptime for specific uses. Version 1.6.0 contains minor bug fixes as well as a few additional options for the Apple Watch.

Pfaeffikon, Switzerland - Power App AG today is proud to announce the release of Battery Doc 1.6.0, an important feature update to their popular battery management app developed exclusively for iPhone, iPad and iPod touch devices. The new version is 1.6.0 and contains bug fixes as well as a few additional options for the Apple Watch. The Bug fixes are non critical and are mostly related to display in foreign languages.

"Adapting Battery Doc to the Apple Watch brought its own challenges since the information that can be displayed on a watch display is very reduced compared to other iOS devices. One of the challenges is to fit the various elements into the smaller display. For some languages the errors have been found only after the last version already hit the App Store, so we pushed this update to hit the App Store as soon as possible" as Christian Schaffner, General Manager of Power APP, explained the short interval for this release.

Battery Doc shows the remaining up-time of an iOS device based on the actual current that is drained from the battery. Based on this measurements various options to maximize battery life can be shown, the calculations are based on a proprietary algorithm developed by Power APP.

Device Requirements:

- * iPhone, iPad, and iPod touch and Apple Watch
- * Requires iOS 6.0 or later
- * 5.8 MB

Pricing and Availability:

Battery Doc 1.6.0 is \$1.99 USD (or equivalent amount in other currencies) and available worldwide exclusively through the App Store in the Productivity category.
