

eWeather HD adds storm tracker, new weather alerts, 365-day weather data

Published on 05/18/15

Elecont LLC today launches a new version of eWeather HD, specifically designed to provide all the weather info you need in one place. Protect your family and your property against recent anomalous weather events. eWeather HD 3.4 can help minimize the harm to your property and protect your personal safety with global storm, tropical cyclone, typhoon and hurricane tracking. This beautiful planning tool provides instant access to worldwide long-range weather data, climate and sea temperatures.

London, United Kingdom - Elecont LLC today is very excited to announce the release of eWeather HD 3.4, their biggest release of 2015. With dozens of new features the app becomes more than just a beautiful and informative weather app - it is a powerful yet easy-to-use weather station right on your iPhone and iPad. The app presents its information in an amazingly intuitive format, with a simple, user-friendly interface, gorgeous animations and single-touch access to weather trends, ranging from a single hour to a year. Don't let the weather interfere with your plans - now you can have the knowledge of what the weather will be so you can plan accordingly.

New eWeather HD provides detailed mapping and prediction of storm impacts worldwide. The information includes future projections, affected areas, wind speeds and safety notes. The app helps you prepare your family and home - a must have for anyone who lives in an area where a hurricane may strike or has loved ones who do. Summer is the time of year when many things change - including the weather. Thunderstorms and hurricanes cause most of the severe summer weather. They can bring lightning, tornadoes and flooding. Prepare for storms, floods, and tornadoes as if you know in advance they are coming, because in the summer, they very likely will.

In addition to the storm tracker, eWeather HD 3.4 provides instant access to archive of global historical weather, climate data and sea-surface temperatures. Using original visualization the app provides all important weather-data at a glance - sun, clouds, rain, snow, local weather extremes and records, holiday weather, day/night temperatures, sky conditions, probability of precipitations and temperature of water. It is an indispensable tool for long weather planning, finding a best place and time for vacation, wedding, hiking or other outdoor activity. Summer is a great time to travel. In reality trying to take a vacation without planning ahead rarely works out that well. Discover your best beach vacation spots with new eWeather HD.

- * Avoid the cyclone season
- * Choose the best destination & best time to visit
- * Find a good place & time for snorkelling, with warm sea temperatures
- * View climate information to decide which is the best time of year for you to go for a trip

eWeather HD combines all possible weather information packed inside a beautiful user-interface and widgets. The app provides 10-day and hourly weather forecasts from multiple sources, severe weather alerts for U.S.A. (via PUSH) and European countries, high-resolution radar and satellite images, unique "weather clock" and 365-day graphics, multilayered, animated weather maps, temperature at beaches around the world, hour-by-hour weather forecast with UV levels, "Feels like" temperatures, rainfall/snowfall amounts, near-realtime data from over 600 NOAA buoys, earthquakes and much more.

eWeather HD 3.4 introduces several brand new components and advantages:

- * Hurricane tracking: The app display projected tracks of active storms
- * Weather & sea temperatures for the next 365 days (long range forecast based on
