

## Remote Media Manager Pro 1.5 - View and Manage Media with any iOS Device

Published on 05/29/15

Macsoftex today introduces Remote Media Manager Pro 1.5, its new easy-to-use file manager and viewer app for iOS devices. With Remote Media Manager Pro, anyone can wirelessly view, copy, move, stream, and manage files between their iOS device and computers, servers, drives and cloud storage, without the need to install any other software. For big screen viewing, users can also stream audio and video from their iOS devices to an HDTV via their Apple TV.

Vitebsk, Belarus - Developer Macsoftex today is proud to announce the release of Remote Media Manager Pro 1.5 for iOS, an intuitive and easy-to-use file manager and viewer compatible with all iOS devices. Remote Media Manager Pro can view, copy, move, stream, and manage files between computers, servers, NAS drives and cloud storage in either direction, without the need to install any other software. This useful app scans and locates devices on any network, and connects in seconds.

Remote Media Manager Pro can play video files, without the need for any type of file conversion. While users can copy files to and from their device if they'd prefer, there is no need to as the app also allows streaming of audio and video from any computer or iOS device on the network. Users can even stream video and audio to their HDTV via an Apple TV.

"Users find themselves jumping through hoops just to view video, or listen to music on their iOS devices," explained Alex Baturski, CEO of Macsoftex. "Remote Media Manager Pro 1.5 gives them the flexibility to watch video or listen to audio no matter where their favorite content is stored on their network or the Internet."

### Features:

- \* Play all video formats without conversion, including: avi, mkv, wmv, mpg, mp4, mov and others
- \* True streaming audio and video on a network without copying files
- \* Connect to FTP, SFTP, SMB, WebDAV, and Cloud services
- \* Wirelessly transfer files from any network device
- \* Stream music, videos and photos from Dropbox, Google Drive, Box, and Yandex.Disk
- \* Watch online television, and listen to Internet radio. (M3U playlists support)
- \* Stream audio and video to an HDTV via an Apple TV device
- \* Access media library stored on the iOS device (Music, Video, Photos)
- \* Control volume and playback using simple screen gestures, or on-screen icons

Remote Media Manager Pro can connect to computers running Mac OS X, Windows and Linux, and can also access files stored on an Apple Time Capsule, FTP, SFTP, SMB, NAS, and WebDAV services, as well as cloud-based services such as Dropbox, Box, and Google Drive. Wirelessly transfer files from any network device, via an easy to use web-based uploading system that allows users to transfer files from their computer or other storage device as simply as loading a web page.

"While many users are content to watch video content on the smaller screen of their iOS devices, there are still those who prefer the big screen," continued Baturski. "For those users, we include the convenient feature of being able to stream both video and audio from an iPhone or iPad to a big screen HDTV, via an Apple TV."

Using AirPlay, users of Remote Media Manager Pro can stream any audio or video content to their HDTV connected device with the tap of an icon. No matter which size screen users are viewing their content on; they can control playback and volume with easy to use screen

gestures. Swipe right to fast-forward, swipe left to rewind, swipe up and down to control the volume. If preferred, the usual VCR-like icon controls are also available to control playback.

Customer Jared Shook loves Remote Media Manager Pro's ease of use: "There are so many apps on the App Store that serve the same purpose as this app, but this one in particular does it the best. It offers you access to your local network storage hosted on your Windows PC as well as virtually anywhere on the net. I would recommend this app to anyone looking for the easiest way to access their Network Attached Storage (NAS) from their iPhone, iPad, or iPod because it is truly the easiest to use."

#### Supported Languages:

Remote Media Manager Pro supports English, Dutch, French, German, Greek, Italian, Japanese, Portuguese, Russian, Spanish, Swedish, Thai and Turkish languages.

#### Device Requirements:

- \* iPhone, iPad, and iPod touch
- \* Optimized for iPhone 5, iPhone 6/6 Plus
