

CarQuiz Math Game Helping Kids Improve Math Scores

Published on 06/05/15

Smile More Studios releases CarQuiz Math Game 1.1, its new math practice app for iOS. And now the company is revealing techniques to ace the game and improve math scores. As players race around a track, they are challenged to solve mental math equations, earning tokens along the way for each correct answer. Smile More Studios gives CarQuiz players tips and tricks for solving the equations with ease. Not only will these techniques help with the game, they'll also help with improving math scores.

Seattle, Washington - Smile More Studios, an independent games studio just outside of Seattle, releases techniques to help players solve math equations quickly. After a successful launch on the App Store, the team has turned toward reaching out to the community and helping players get better at the gameplay.

"We are beginning to release gameplay video with voiceovers solving the equations out loud. We want to help players learn how to pick the best method for each equation." explained Scott Martin, the game's designer. "Smile More Studios is promoting mental math techniques that will help players solve equations for both the game and their schoolwork."

CarQuiz is a math game for kids, where the player races around a track solving math equations. The game builds math skills in addition, subtraction, multiplication and division while promoting fun, thematic environments. As the player accumulates tokens, they earn awards and unlock more items. CarQuiz Math Game features:

- * Skill Building
- * Math Practice
- * Difficulty Levels
- * Player Options
- * Family Sharing
- * 5 Minute Gameplay
- * Game Support

CarQuiz challenges players to solve math equations quickly like 13×17 or $124 - 89$. Can you answer these in your head in just a few seconds? Of course you can! The tutorials we are sharing will help players solve these equations quickly without pen and paper. The techniques take time to master, but once learned, will last a lifetime, and make all other math classes easier. We believe that if kids can master the essential skills of basic math calculations, they will do better in all other math classes for the rest of their education. We are focused on building a support site to help players choose the most efficient method for solving an equation.

Device Requirements:

- * iPhone, iPad, and iPod touch
- * Requires iOS 6.1 or later
- * 254 MB

Pricing and Availability:

CarQuiz Math Game 1.1 is only \$0.99 USD (or equivalent amount in other currencies) and available worldwide exclusively through the App Store in the Games category. Visit Smile More Studios' YouTube channel for CarQuiz gameplay videos and a link to their Mental Math Tutorials.
