

AnkiApp 2.0 for Mac OSX: Save Time by Studying with Flashcards

Published on 06/06/15

Admium Corp. announces the release of AnkiApp Flashcards 2.0 for Mac OS X, its education app for memorizing a wide variety of information. AnkiApp allows users to create their own flashcards using rich formatting features, such as bold, italics, underlines, bulleted and numbered lists, and colored text. In addition to supporting the creation of flashcards, it provides access to millions of pre-made flashcards for users to get started studying right away.

San Francisco/USA - Admium Corp. is proud to announce the release of AnkiApp Flashcards 2.0 for Mac OS X, its education app for memorizing a wide variety of information. AnkiApp allows users to create their own flashcards using rich formatting features, such as bold, italics, underlines, bulleted and numbered lists, and colored text. In addition to supporting the creation of flashcards, it provides access to millions of pre-made flashcards for users to get started studying right away.

The most interesting feature, which really sets AnkiApp apart from the competition, is the custom-engineered study algorithm it uses. Designed by the team's published neuroscientist, AnkiApp's algorithm tests users on their knowledge of each flashcard, and then uses Artificial Intelligence (AI) to automatically focus their studying on their hardest cards. It's like a robotic "knowledge coach". For serious students, with thousands of flashcards to study, this can provide a massive time savings.

According to app market analytics firm App Annie, AnkiApp has ranked #1 in the Education category of the Mac App Store in 22 countries, worldwide. Marketing director Matt Nelson says, "We've had users study everything from pharmacology, to Japanese, to Krav Maga. It's a remarkably powerful and flexible tool for learning. I use it myself all the time."

Features:

- * Letter grades for flashcards and decks, to track progress
- * Charts to see how much you've been studying and keep you motivated
- * Mobile clients for iPhone, iPad, Android, and Windows Phone, to study on the go
- * Automatic sync between AnkiApp on all your devices
- * Easily review decks front-to-back or back-to-front
- * Text-to-Speech (TTS) reads to you, in multiple languages
- * Share decks with friends

System Requirements:

- * Mac OS X 10.9 or above
- * 64-bit processor
- * 6.6 MB

Pricing and Availability:

AnkiApp Flashcards 2.0 is \$9.99 and is available worldwide exclusively through the Mac App Store.
