

Language Translation is Now More Fluidic with Revamped Nommo Translate

Published on 07/31/15

Independent developer, Kwanza Wagner today announces Nommo Translate 1.4, an update to the intuitive reference app for Android, iPhone and iPad users. Simultaneously interpret a foreign language to the desired language. Nommo Translate translates any text, voice or text in an image into 60+ languages, utilizing Google's Translation API to ensure authenticity of results and accurateness of the output. Version 1.4 has been completely revamped for better performance and usability.

Easton, Pennsylvania - Independent developer, Kwanza Wagner today is proud to announce the release of Nommo Translate 1.4, an update to the intuitive reference app for Android, iPhone and iPad users. Think of a smartphone app that translates and interprets in more than 60 languages, with inputs by speaking, writing and scanning - that's Nommo Translate. Nommo Translate is an all-in-one translation and interpretation App that was recently revived to enhance its capabilities in doing the desired job with ease. Its new app is more fluidic, bug-free and stable that allows its users to:

- * Simultaneously interpret a foreign language to the desired language
- * Communicate with everyone globally without any language barrier
- * Save the translated text in history with desired document name
- * Instantly translate by speaking, typing as well as through scanned text
- * Take the advantage of two-user mode to use the app as an interpreter to communicate with other person who speaks foreign language and doesn't understand the user's language

What would you do when you meet someone who speaks a different language? With the Nommo

Translate app. installed on your smartphone, you may be able to interpret the conversation in your native language and at the same time, communicate what you want to say into the language the other person understands. This app also allows users to scan a typed document or signage in their native language to a desired language. The features provide full functionality and usage in a simplest and quickest way. The app is developed with features such as:

- * Speak to translate: This module allows users to speak the desired language and translate into desired language
- * Type to translate: This module allows users to type the language in left side and translate that text into desired selected language
- * Scan to translate: This module contains, user can scan the printed image and then translate the scanned text into desired language

Once set, the app is able to detect the language and give a translation into one of the desired languages using integrated algorithms with accuracy and speed.

Device Requirements:

- * iPhone, iPad, and iPod touch
- * Optimized for iPhone 5, iPhone 6/6 Plus
- * Requires iOS 7.0 or later
- * 12.4 MB
